TABLE OF CONTENTS

Electronic Pressure Measurement

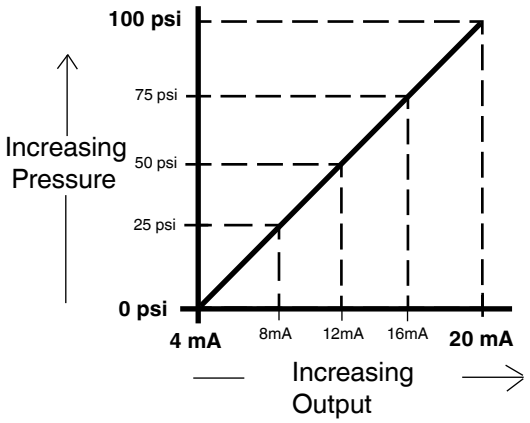
All WIKA electronic pressure transmitters and transducers convert an applied pressure into an electrical signal. This signal is sent to computers, PLC's (programmable logic controllers), chart recorders, digital panel meters or other devices that interpret this electrical signal and use it to display, record and/or change the pressure in the system being monitored.

The most popular signal used in industrial applications is a 4-20 milliamp (mA) 2-wire current loop. Other signals used include 1-5 volts, 0-5 volts, 0.5-4.5 volts, 0-10 volts (3 wire systems) and 0-100 millivolts (4 wire systems). In many cases the display device that the transmitter is connected to can accept more than one type of output - for example, 4-20 mA or 0-5 volts. Because of its popularity, WIKA stocks a large inventory of 4-20 mA output transmitters in many different models.

A pressure transmitter converts an unamplified signal such as 2mV/V into an amplified signal like 4-20mA or 0-10V. A pressure transducer converts applied pressure to an unamplified signal such as 2mV/V. Many users refer to transmitters and transducers interchangeably. This can create some confusion, but it may be helpful to note that general purpose pressure sensors are most commonly referred to as pressure transducers.

Linearity

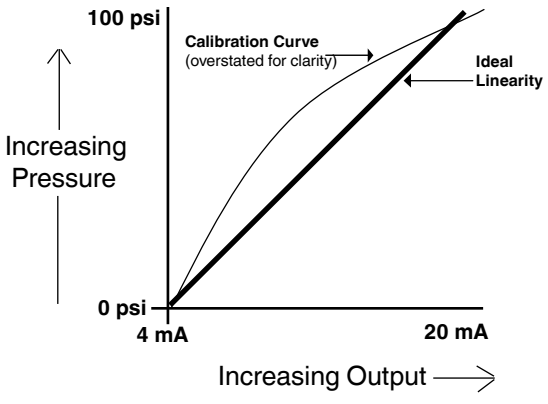
What makes these devices useful is that the output is directly proportional to the applied pressure. WIKA transmitters are described in part by pressure range and output type. For example, a transmitter with a 0-100 psi range and 4-20 mA output would produce a 4 mA output at 0 pressure and 20 mA at 100 psi.



Because the transmitter output is linear, it will directly relate to the applied pressure. At 25 psi the output will be 8 mA, at 50 psi, 12 mA and at 75 psi, 16 mA. If the device reading this mA signal is a programmable panel meter, it can convert the 4-20 mA signal to 0-100 psi and display the pressure on the digital readout. Since the 4-20 mA is consistent, the meter can be programmed to display any engineering units desired. If a bar reading is required, the meter is programmed to display 0 bar at 4 mA and 6.89 bar at 20 mA. The meter circuitry completes all other calculations automatically.

Accuracy

The straight line shown above represents an ideal, perfectly linear output. In reality, errors are introduced into the output signal by the various transmitter components. The amount of error introduced refers to the deviation from the ideal straight line.



Electronic Pressure Measurement

"Accuracy" most commonly refers to the percent deviation from the ideal. It can also be calculated using linearity, hysteresis and repeatability values. Most WIKA transmitters have less than a 0.25% linearity deviation over the span. See the specifications section for each model number for detailed information. In industrial applications, repeatability is usually more important than "full scale accuracy" matching a traceable standard. WIKA transmitters feature excellent repeatability - less than 0.05% span for most models.

When comparing accuracy, note there are many different ways manufacturers calculate accuracy. Be sure to consider temperature compensation, as industrial environments rarely match the laboratory conditions sometimes used by other transmitter manufacturers when determining accuracy.

Performance

WIKA transmitters and transducers are designed for long term, reliable performance in difficult industrial environments. Most models feature stainless steel construction, moisture and vibration protected circuitry, and all are calibrated and tested prior to shipment. A variety of options are available on most models to meet specific needs.

Applications

WIKA transmitters are available in many different models that have features to meet the needs of specific applications. Model types are described below:

Standard industrial grade transmitters - general purpose 0.25% accuracy transmitters for many industrial applications such as hydraulics and pneumatics.

Flush diaphragm transmitters - feature a non-clogging, flat diaphragm for use when the media is of high viscosity or contains particulates that might plug the 1/8" orifice found on the standard industrial (NPT) series.

Intrinsically safe transmitters - used in environments containing explosive or flammable gases or liquids. These instruments are designed so they cannot generate enough heat or spark to ignite flammable media or flammable gases in the environment. They require the use of intrinsically safe barriers and provide protection similar to explosion-proof devices without requiring containment in an explosion-proof housing. Approved for Class I Division 1 hazardous locations.

NEMA 4X transmitters with field case- designed for extremely dirty or corrosive environments, they feature washdown and corrosion resistance.

OEM transmitters - 0.5% accuracy class instruments without adjustable zero and span for general purpose pressure measurement applications. They feature excellent repeatability and vibration resistance.

A-10 - Low cost, high level output for general purpose pressure measurement applications.

OEM sensors - provide a "low level" millivolt-per-volt output for OEM design engineers who want to build their own power supply and signal conditioning circuitry.

Submersible liquid level transmitters - measure the static pressure of liquid above the diaphragm and are used in many liquid level monitoring and control applications.

3A Sanitary transmitters - feature a Tri-Clamp® quick release connection with flush diaphragm for use in food and pharmaceutical pressure measurement applications. The connection is designed to prevent product buildup and reduce the possibility of bacterial contamination of the product.

High precision digital transmitters - for laboratory or industrial applications where 0.1% or 0.05% accuracy is required along with durable, industrial grade construction.

UniTrans® universal pressure transmitter - features user programmability and LCD display.

Local indicating transmitters - feature a 4" gauge and a transmitter for local and remote pressure indication.

Low/differential pressure transmitters - measure clean, dry, inert gaseous media from 0.2 inches water column to 15 psi.

E-10 explosion-proof transmitters - approved for Class I Division 1 hazardous locations.

N-10 non-incendive transmitters - approved for Class I Division 2 hazardous locations.

Digital panel meters & controllers -user programmable to display pressure in any desired engineering units. They are available with a variety of options including dual programmable relays for alarm or control applications.

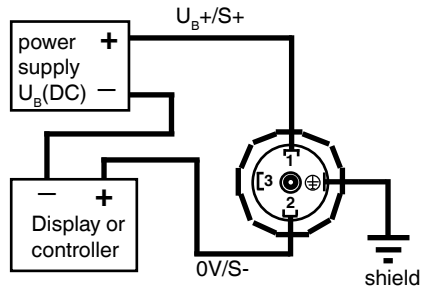
Contact WIKA for additional information and product support for specific applications.

Electronic Pressure Wiring Schematics

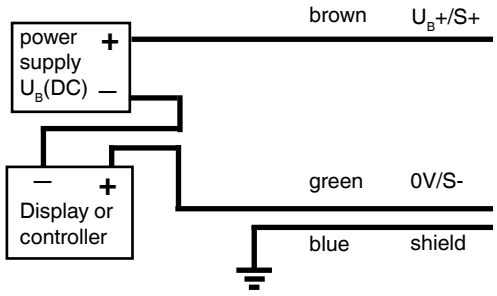
4-20 mA 2-wire system

The 2-wire system connects the power supply, transmitter and indicating/recording instrument in a series circuit. This creates a "current loop" with the transmitter functioning as a current regulating device.

DIN connector



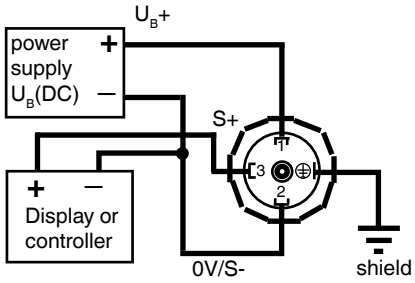
Cable with free ends



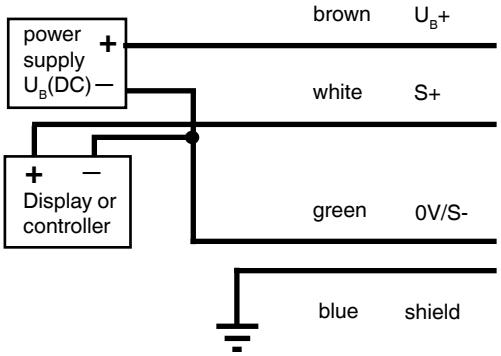
0-5V, 1-5V, 0.5-4.5V or 0-10V 3-wire system

The 3-wire system features separate leads for the signal and power supply. The third lead is common minus for both devices. The signal source and indicating/recording instrument are connected in series, the power supply in parallel.

DIN connector



Cable with free ends



Notes:

Terminal coding:

U_B +	Plus power supply
0V	Minus power supply (common, ground)
S +	Plus output signal
S -	Minus output signal (common, ground)
Shield	Cable shield / transmitter body

The supply voltage must be higher than the minimum required voltage as determined by the load equation for the specific transmitter. Refer to the specifications section of the data sheets for additional information.

Type S-10, S-11 General Purpose Pressure Transmitters

Applications

- Hydraulics and pneumatics
- Test equipment
- Pump and compressor control
- Liquid level measurement

Special Features

- Standard ranges available from stock
- 4-20 mA 2-wire output signal, others available
- Highly resistant to pressure spikes and vibration
- Stainless steel case and wetted parts
- Can be assembled to diaphragm seals for special applications

Left: S-10 with NPT process connection
Center: S-11 with flush diaphragm process connection
Right: S-11 with flush diaphragm process connection and integral cooling element

Description

WIKA S-10 and S-11 pressure transmitters are precision engineered to fit most industrial pressure measurement applications. The compact, rugged design makes these instruments suitable for applications including hydraulics and pneumatics, vacuum, test equipment, liquid level measurement, press control, compressor control, pump protection and numerous other processing and control operations. A wide range of electrical connection and process connection options are available to meet almost any requirement.

Rugged construction
The S-10 features an all-welded stainless steel measuring cell for improved media compatibility. There are no internal soft sealing materials that may react with the media or deteriorate over time. The compact case is also made of stainless steel and is available with environmental protection ratings up to NEMA 6P / IP 68.

The S-11 transmitter features a flush diaphragm process connection. The S-11 is specifically designed for the measurement of viscous fluids or media containing solids that may clog a NPT process connection. Flush diaphragm pressure transmitters are available in pressure ranges from 50 InWC to 8,000 psi. For high temperature media, an integral cooling element is available on the S-11. This option increases the maximum media temperature to 302 °F.

Each instrument undergoes extensive quality control testing and calibration to achieve an accuracy of ≤ 0.25% full scale. The printed circuit boards use state-of-the-art surface mount technology and are potted in silicone gel for protection against mechanical shock, vibration and moisture. Each is individually temperature compensated to assure accuracy and long-term stability even when exposed to severe ambient temperature variations.

Specifications	Type S-10, S-11								
Pressure range	50 InWC	5 psi	10 psi	25 psi	30 psi	60 psi	100 psi	160 psi	200 psi
Maximum pressure*	14 psi	29 psi	58 psi	145 psi	145 psi	240 psi	500 psi	1,160 psi	1,160 psi
Burst pressure**	29 psi	35 psi	69 psi	170 psi	170 psi	290 psi	600 psi	1,390 psi	1,390 psi
Pressure range	300 psi	500 psi	1,000 psi	2,000 psi	3,000 psi	5,000 psi	8,000 psi	10,000 psi[1]	15,000 psi[1]
Maximum pressure*	1,160 psi	1,160 psi	1,740 psi	4,600 psi	7,200 psi	11,600 psi	17,400 psi	17,400 psi	21,750 psi
Burst pressure**	1,390 psi	5,800 psi	7,970 psi	14,500 psi	17,400 psi	24,650 psi	34,800 psi	34,800 psi	43,500 psi

{vacuum, gauge pressure, compound ranges, and absolute pressure references are available}

[1)] Ranges only available with Model S-10

[2)] For Model S-11 the burst pressure is limited to 21,000psi unless the pressure seal is accomplished by using the sealing ring underneath the hex.

*Pressure applied up to the maximum rating will cause no permanent change in specifications but may lead to zero and span shifts

**Exceeding the burst pressure may result in destruction of the transmitter and possible loss of media

Materials		
■ Wetted parts		(other materials see WIKA diaphragm seal program)
➢ Type S-10		Stainless steel
➢ Type S-11		Stainless steel
		O-ring: NBR [3)] {Viton® or EPDM}
■ Case		Stainless steel
Internal transmission fluid [4)]		Synthetic oil {Halocarbon® oil for oxygen applications} [5)]
		{Listed by FDA for food applications}}

[3)] O-ring made of Viton® or EPDM for type S-11 with integral cooling element.

[4)] Not available with type S-10 in pressure ranges >300 psi.

[5)] Media temperature for oxygen version: -4 ... +140 °F (-20....+60°C). Oxygen version is not available in vacuum and absolute pressure ranges or with S-11 > 500 psi

Power supply U_B [6)]	U_B in DC V	$10 < U_B \leq 30$ (14 ... 30 with signal output 0 ... 10 V)
Signal output and	R_A in Ohm	4 ... 20 mA, 2-wire $R_A \leq (U_B - 10\ V) / 0.02\ A$
maximum load R_A		0 ... 20 mA, 3-wire $R_A \leq (U_B - 3\ V) / 0.02\ A$
		{0 ... 5 V, 3-wire} $R_A > 5000$
		{0 ... 10 V, 3-wire} $R_A > 10{,}000$ {other signal outputs available}
Adjustability zero/span	%	± 5 using potentiometers inside the instrument
Response time (10 ... 90 %)	ms	≤ 1 (≤ 10 ms at media temperatures below –22°F (-30°C) for ranges < 300 psi
		or with flush diaphragm process connection)
Isolation voltage	DC V	500

[6)] NEC Class 02 power supply (low voltage and low current max. 100 VA even under fault conditions)

Accuracy [7)]	% of span	≤ 0.25 {0.125} [8)] (BFSL)
	% of span	≤ 0.5 {0.25} [8)] (limit point calibration)

[7)] Including linearity, hysteresis and repeatability.
Limit point calibration performed in vertical mounting position with pressure connection facing down.

[8)] Improved accuracy is available for pressure ranges ≥ 100 InWC

Non-repeatability	% of span	≤ 0.1	
1-year stability	% of span	≤ 0.2 (at reference conditions)	
Permissible temperature of			
■ Medium [9)]		-22 ... +212 °F {-40 ... +257 °F}	-30 ... +100 °C {-40 ... +125 °C}
		S-11 with cooling element: -4 ... +302 °F	S-11 with cooling element: -20 ... +150 °C
■ Ambient [9)]		-4 ... +176 °F	-20 ... +80 °C
		S-11 with cooling element: -4 ... +176 °F	S-11 with cooling element: -20 ... +80 °C
■ Storage [9)]		-40 ... +212 °F	-40 ... +100 °C
		S-11 with cooling element: -4 ... +212°F	S-11 with cooling element: -20 ... +100 °C

[9)] Also complies with EN 50178, Tab. 7, Type C, Class 4KH Operation, 1K4 Storage, 1K3 Transport

Compensated temperature range		32 ... +176 °F	0 ... +80 °C
Temperature coefficients (TC) within			
compensated temp range:			
■ Mean TC of zero	% of span	≤ 0.2 / 10 K (< 0.4 for pressure range ≤ 100 InWC)	
■ Mean TC of range	% of span	≤ 0.2 / 10 K	

CE - conformity		
■ Pressure equipment directive		97/23/EC
■ EMC directive		2004/108/EEC, EN 61 326 Emission Group (Group 1, Class B) and
		Immunity)industrial locations
Shock resistance	g	1000 according to IEC 60068-2-27 (mechanical shock)
Vibration resistance	g	20 according to IEC 60068-2-6 (vibration under resonance)
Wiring protection		Protected against reverse polarity, overvoltage and short circuit
Weight	lb	Approx. 0.4

Type F-20, F-21 General Purpose Pressure Transmitters with NEMA 4X Integral Junction Box

Applications

- Chemical industry
- Food industry
- Pharmaceutical industry
- Corrosive environments
- Mechanical engineering

Special Features

- Pressure ranges from 50 InWC to 15,000 psi
- 4-20mA and voltage signal outputs available
- Compact size and rugged construction
- All stainless steel design
- Integral electrical connection

Left: F-20 with standard NPT connection
Right: F-21 with flush diaphragm

Description

Compact, rugged design
The F-2X series of pressure transmitters are designed for installation in difficult, corrosive environments. The smooth exterior surfaces reduce areas where contaminants may collect and make it ideal for use in the food and pharmaceutical industries where wash-down procedures for cleanliness are required.

The all stainless steel case meets NEMA 4X requirements for wash-down and corrosion resistance and ingress protection is available up to IP 67.

Easily accessible electrical connection
The sophisticated design of this transmitter provides for fast, easy installation. The junction box cover unscrews for access to the internal spring clip terminal block.

Additional features
Transmitters with the 4-20mA output signal include an internal test circuit connection that permits the transmitter to be tested without disconnecting the primary 4-20 mA circuit. The model F-20 features an all-welded stainless steel measuring cell for improved media compatibility. There are no internal soft sealing materials that may react with the media or deteriorate over time.

The model F-21 features a flush diaphragm process connection. This flat sensing surface is specifically designed for the measurement of viscous fluids or media containing solids that may clog the NPT process connection.

Specifications — Model F-20, F-21

Pressure range	50 InWC	5 psi	10 psi	25 psi	30 psi	60 psi	100 psi	160 psi	200 psi
Maximum pressure*	15 psi	29 psi	58 psi	145 psi	145 psi	240 psi	500 psi	1,160 psi	1,160 psi
Burst pressure**	29 psi	35 psi	69 psi	170 psi	170 psi	290 psi	600 psi	1,390 psi	1,390 psi
Pressure range	300 psi	500 psi	1,000 psi	2,000 psi	3,000 psi	5,000 psi	8,000 psi	10,000 psi[1]	15,000 psi[1]
Maximum pressure*	1,160 psi	1,160 psi	1,740 psi	4,600 psi	7,200 psi	11,600 psi	17,400 psi	17,400 psi	21,750 psi
Burst pressure**	1,390 psi	5,800 psi	7,970 psi	14,500 psi	17,400 psi	24,650 psi	34,800 psi	34,800 psi	43,500 psi

{vacuum, gauge pressure, compound ranges, and absolute pressure references are available}

[1] Ranges only available with type F-20

[2] For type F-21 the burst pressure is limited to 21,000psi unless the pressure seal is accomplished by using the sealing ring underneath the hex.

*Pressure applied up to the maximum rating will cause no permanent change in specifications but may lead to zero and span shifts

**Exceeding the burst pressure may result in destruction of the transmitter and possible loss of media

Materials					
■ Wetted parts		(for other materials see WIKA diaphragm seal program)			
➢ type F-20		Stainless steel			
➢ type F-21		Stainless steel; O-ring: NBR {Viton® or EPDM}

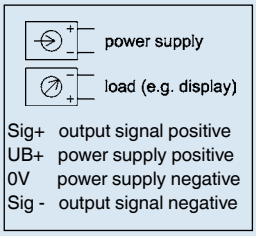
Legend:



Calibration

Remove the junction box cover. Attach a meter and power supply to the electrical connector. For gauge ranges the zero potentiometer can be adjusted to produce a null output when no pressure is applied. Span adjustment requires the use of a reference pressure source. Compound and absolute ranges require a vacuum and pressure source. When calibration is complete, reinstall the junction box cover hand tight.

Type C-10 General Purpose Pressure Transmitters

Applications

- Hydraulics and pneumatics
- Mechanical engineering
- General industrial applications

Special Features

- Standard ranges from 0…100 InWC to 0…15,000 psi
- Excellent shock and vibration resistance
- Environmental protection to NEMA 4 / IP 67
- Stainless steel case and wetted parts

Left: C-10 with MiniDIN connector
Right: C-10 with optional cable

Description

The WIKA C-10 provides performance and economy for a wide range of OEM applications. They are especially suited to applications subject to severe mechanical shock, vibration and electromagnetic interference. Typical applications include hydraulics and pneumatics, compressor controls, pump protection, refrigeration and air conditioning systems.

Dependable performance

The C-10 features an all-welded stainless steel measuring cell for improved media compatibility. There are no internal soft sealing materials that may react with the media or deteriorate over time. The case is also made of stainless steel and is available with environmental protection ratings up to NEMA 4 / IP 67.

Pressure ranges up to 300 psi use a piezoresistive measuring cell. The higher pressure ranges use thin film sensor technology. Both are time proven highly reliable sensor technologies.

A standard signal output of 4-20 mA allows the C-10 to be integrated into many existing applications. Many custom signal outputs, process connections and electrical connections are available.

Each C-10 undergoes extensive quality control testing and calibration to achieve an accuracy of ≤ 0.50% full scale. The printed circuit boards use state-of-the-art surface mount technology. Each is individually temperature compensated to assure accuracy and long-term stability even when exposed to severe ambient temperature variations.

Type A-10 General Purpose Pressure Transmitters

Applications

- Mechanical engineering
- Machine tools
- Process control and automation
- Hydraulics and pneumatics
- Pumps and compressors

Special Features

- Pressure ranges: from 0 … 15 psi up to 0 … 10,000 psi, vacuum and compound available
- Non-linearity: ≤ ± 0.5% BFSL (≤ ± 0.25% available)
- Signal output: 4-20 mA, 0-10 V, 0-5 V, others available
- Electrical connection: DIN 175301-803 A and C, M12x1, 6 ft. cable, others available
- Pressure connection: 1/4 NPT , 1/2 NPT , SAE #4, others available

Description

The WIKA A-10 pressure transmitter is precision engineered and manufactured to fit many industrial and OEM pressure measurement applications. The rugged design provides resistance to vibration, shock, wide temperature variations, RFI and other extreme environmental conditions that are typical of industrial and OEM applications.

Performance and reliability is enhanced by the all stainless steel welded measuring cell that eliminates the need for soft sealing materials that may deteriorate over time. The state-of-the-art manufacturing and assembly process increases the long term reliability of the A-10.

Primary applications include process control and automation, hydraulics, pneumatics and machine controls.

Type OT-1 General Purpose OEM Pressure Transmitters

Applications

- General purpose high-volume OEM applications

Special Features

- Pressure ranges from 100 psi to 8,000 psi
- Compound ranges available
- Durable thin film sensor technology
- Environmental protection to IP67 / NEMA 4X
- MTTF values over 100 years

Type OT-1 Pressure Transmitter

Description

OT-1 pressure transmitters are precision engineered for applications where performance and durability are critical. Many different process and electrical connections are available allowing the OT-1 to be easily integrated with a wide variety of applications.

The all-welded thin film measuring cell eliminates the need for additional soft sealing materials that may deteriorate over time. The thin film sensor uses sputtered technology that provides excellent long-term stability in applications producing frequent pressure cycles. The glass reinforced PBT plastic case has been used in under hood automotive applications for many years. A metal sleeve inside the case provides excellent EMI protection to 100v/m. The electrical connections meet NEMA 4X / IP 67 environmental protection ratings.

The OT-1 is manufactured on a fully automated production line providing consistent quality and highly competitive pricing in large quantities. Custom modifications are available for large quantity requirements.

Type DG-10 Digital Pressure Gauge

Applications

- Mechanical engineering
- Hydraulics and pneumatics
- Pumps and compressors
- Service

Special Features

- Pressure ranges: from 0 … 30 psi up to 0 … 10,000 psi
- Display accuracy: ≤ ± 0.25% B.F.S.L.
- Pressure connections: G1/4 DIN 3852-E, 1/4 NPT male, 1/2 NPT male, G1/4B, G1/2B and others
- Case: stainless steel, 3.15“ (80 mm) diameter
- Power supply: 2x 1.5 V Type AA cell

DG-10-S
Standard Version

DG-10-E
Enhanced Version

Description

Durable, precise local display
A digital display is ideal for precise and fast pressure readings. The DG-10 features a durable stainless steel housing and integral battery power supply making it suitable for a wide range of applications and industries.

The multi-function display features a bar graph with a drag pointer function and a MIN/MAX memory. The MIN/MAX memory feature permits later recall of the minimum and maximum pressure readings.

Standard and enhanced versions
The DG-10 is available in two versions: standard (DG-10-S) and enhanced (DG-10-E). Both versions allow the user to easily switch between the most widely-accepted international measurement units including bar, psi and MPa.

Additional features of the enhanced version include a back-lit display for use in low light conditions and a housing that can be rotated for optimal viewing. Additional user-programmable functions of the DG-10-E include auto power-off, tare function, and password protection.

Proven pressure measurement technology
Sensors manufactured by WIKA provide high accuracy, long-term stability and excellent repeatability. For optimal performance, pressure ranges up to 600 psi (50 bar) use the WIKA ceramic sensor. Pressure ranges of 1450 psi (100 bar) and higher utilize WIKA thin film sensor technology.

Type PSD-30 Pressure Transmitter with Integral LED Display and Programmable Solid State Switches

Applications

- Pumps and compressors
- Hydraulics and pneumatics
- Machine tools
- Machine building

Special Features

- Available with single or dual NPN or PNP solid state switches
- High visibility, rugged 14-segment red LED display electronically rotates 180° for top-down installation
- Independent rotation between the M12x1 electrical connection and the display
- User-friendly, intuitive 3-key operation
- Versions with 4-20 mA or 0-10V analog output available
- Programming menu meets VDMA Standards for user friendly navigation

c UL us LISTED

Type PSD-30 Pressure Transmitter with Integral LED Display

Description

Award-winning functionality and design

The design and outstanding functionality of the PSD-30 received the ***IF Product Design Award*** in 2009. The display, with its .35“ (9 mm) high digits, was designed to be as large as possible and positioned at an angle, so the pressure reading is visible from a distance of at least 10 feet (3 meters). Time-proven and rugged LED technology with 14-segment display is used so alphanumeric messages are much easier to understand compared to typical 7-segment displays.

The large, ergonomically designed programming push buttons provide the user with tactile feedback for immediate confirmation that the touch event was registered by the transmitter. The user-friendly menu navigation layout meets the new VDMA Standard form for fluid sensors (24574-1, Part 1, pressure switch). The goal of the VDMA is to simplify the use of pressure switches by standardizing menu navigation and display parameters.

Flexible and adaptable

The PSD-30 can be adjusted three different ways to fit specific installation requirements. The display and electrical connection can be rotated independently to maximize visibility while still orienting the electrical connection in the best position for the cable connector. If the transmitter is installed overhead or upside down the display can be electronically rotated 180°.

Quality and reliability

Time tested, proven WIKA thin film and piezoresitive pressure sensor technology is an integral part of the PSD-30 providing the high quality and long term reliability users demand.

Type TSD-30 Temperature Switch with Integral LED Display

Applications

- Machine tools
- Hydraulics
- Coolant and lubrication systems
- Machine building

Special Features

- Available with single or dual NPN or PNP solid state user-programmable switches
- High visibility, rugged 14-segment red LED display electronically rotates 180° for top-down or horizontal installation
- Independent rotation between the M12x1 electrical connection and the display to optimize installation position
- User-friendly, intuitive 3-key operation
- Versions with 4-20 mA or 0-10V analog output available
- Programming menu meets VDMA Standards for user friendly navigation

TSD-30 Temperature Switch

Description

Award-winning in design and functionality
The design and outstanding functionality of the PSD-30 pressure switch received the IF Product Design Award in 2009. The TSD-30 temperature switch uses a similar design and functionality. The display, with its .35" (9 mm) high digits, was designed to be as large as possible and positioned at an angle, so the temperature reading is visible from a distance of at least 10 feet (3 meters). Rugged LED technology with a 14-segment display is used so alphanumeric messages are much easier to understand when compared to typical 7-segment displays.

The large, ergonomically designed programming push buttons provide the user with tactile feedback for immediate confirmation that the touch event was registered by the switch. The user-friendly menu navigation layout meets the VDMA standard for fluid sensors (24574-2, part 2, temperature switches). The goal of the VDMA is to simplify the use of switches by standardizing menu navigation and display parameters.

Flexible and adaptable
The TSD-30 can be adjusted three different ways to fit specific installation requirements. The display and electrical connection can be rotated independently to maximize visibility while still orienting the electrical connection in the best position for the cable connector. The display can be electronically rotated 180° if needed for specific installation requirements.

Quality and reliability
Time tested, proven WIKA technology is an integral part of the TSD-30 providing the high quality and long-term reliability users demand.

Measuring ranges

Temperature	Standard	Option [1)]
°F	-4 ... +176	-4 ... +248
°C	-20 ... +80	-20 ... +120

1) see "Operating conditions"

Display

14-segment LED, red, 4-digit, character size .35" (9 mm).
Display can be rotated 180° using the programming menu.

Display update
200 ms

Output signal

Switching output 1	Switching output 2	Analog signal
PNP	-	4 ... 20 mA
PNP	-	DC 0 ... 10 V
PNP	PNP	-
PNP	PNP	4 ... 20 mA
PNP	PNP	DC 0 ... 10 V

Also available with NPN switch output.

Temperature offset adjustment
± 3 % of span

Scale setting
Zero point: max. +25 % of span
Span value: max. -25 % of span

Analog signal
Load
- Current: ≤ 500 Ω
- Voltage: > 10 kΩ

Switching output
Switch point 1 and 2 are independently user adjustable

Function
- Normally open / closed: user adjustable
- Window and hysteresis: user adjustable

Switching voltage: Power supply – 1 V
Switching current: max. 250 mA per switch output
Adjustment accuracy: ≤ 0.5 % of span

Voltage supply

Power supply
DC 15 ... 35 V

Current consumption
max. 100 mA

Total current consumption
max. 600 mA (incl. switching current)

Measuring element

Pt1000, 2-wire, DIN EN 60751 / class A

Insertion length (F)

Inches (mm)					
.98" (25)	1.97" (50)	3.94" (100)	5.91" (150)	9.84" (250)	13.78" (350)

Response time
T05 < 5 s (per DIN EN 60751)
T09 < 10 s (per DIN EN 60751)

Maximum working pressure
2250 psi (150 bar)

Accuracy

Analog signal
≤ ± 0.5 % of span

Switching output
≤ ± 0.8 % of span

Display
≤ ± 0.8 % of span ± 1 digit

Temperature sensor
± (0.15 K + 0.002 | t |)

| t | is the value of the temperature in °C independent from the sign.

The actual achievable accuracy is determined by the specific installation (immersion depth, sensor length, and operating conditions). This applies more for large temperature gradients between the environment and the medium.

Reference conditions

Temperature: 59-77 °F (15 ... 25 °C)
Atmospheric pressure: 950 ... 1,050 mbar
Humidity: 45 ... 75 % relative
Nominal position: Process connection lower mount (LM)
Power supply: DC 24 V
Load: see "output signal"

Operating conditions

Temperatures and humidity

Medium temperature: -4 ... +176 °F (-20 ... +80 °C)
Ambient temperature: -4 ... +176 °F (-20 ... +80 °C)
Storage temperature: -4 ... +176 °F (-20 ... +80 °C)
Permissible humidity: 45 ... 75 % relative

Installation instructions

Mounting position: as required

At high medium or ambient temperatures, take steps to make sure that the instrument case temperature does not exceed 176 °F (80 °C) in continuous operation (the temperature is measured at the hex of the process connection).

The thread must not be immersed into medium at temperatures above 176 °F (80 °C)

Process connections

Connections

Standard	Thread

- Versions with 4-20 mA or 0-10V analog output available
- Programming menu meets VDMA Standards for user friendly navigation

LSD-30 Level Switch

Description

Award-winning in design and functionality
The successful design and functionality of the WIKA switch family were confirmed when the PSD-30 pressure switch won the “iF product design award 2009”. The LSD-30 level switch uses a similar design and functionality. The display, with its .35” (9 mm) high digits, was designed to be as large as possible and positioned at an angle, so the level reading is visible from a distance of at least 10 feet (3 meters).
Rugged LED technology with a 14-segment display is used so alphanumeric messages are much easier to understand when compared to typical 7-segment displays.

The large, ergonomically designed programming push buttons provide the user with tactile feedback for immediate confirmation that the touch event was registered by the switch. The user-friendly menu navigation layout meets the VDMA standard for fluid sensors (24574-2, part 4, level switches). The goal of the VDMA is to simplify the use of switches by standardizing menu navigation and display parameters.

Flexible and adaptable
The LSD-30 can be adjusted two different ways to fit specific installation requirements. The display and electrical connection can rotate independently to maximize visibility, while still allowing orientation of the electrical connection for the optimal position of the cable connector.

Quality and reliability
Time-tested and proven WIKA technology is an integral part of the LSD-30 to provide the high quality and long term reliability users demand.

Measuring ranges

for parallel process connections

Type E-10, E-11 Hazardous Area Explosion-proof Transmitters

FM APPROVED

Meets ANSI / ISA 12.27.01-2003 single seal requirements - no dual seal required

Applications

- Wellhead monitoring
- Refining, chemical, petrochemical
- Offshore platforms, pipelines
- Natural gas compressors

Special Features

- FM-approved explosion-proof for Class I Division 1 hazardous locations
- Available with 4 ... 20 mA, 2-wire or 1 ... 5 V, 3-wire low power output signals
- Engineered to withstand harsh environments
- NACE MR0175 compliant wetted parts
- Retrofits many existing oil and gas applications

Left: E-10 NPT pressure transmitter with cable
Right: E-11 flush diaphragm pressure transmitter with optional flying leads

Description

The E-10 and E-11 explosion-proof pressure transmitters are specifically designed to meet the durability and performance requirements of oil and gas pressure monitoring applications.

These pressure transmitters feature an industry standard 4-20 mA 2-wire or 1-5V 3-wire low power signal output and NEMA 4X (IP67) ingress protection. They are extremely resistant to pressure spikes, vibration and moisture intrusion. NACE MR-01-75 compliant wetted parts provides extra resistance against sulfide stress cracking when exposed to media containing sulphur. Both are available with a factory sealed epoxy flying lead assembly for easier installation.

The E-10 features an NPT process connection with an all-welded stainless steel measuring cell for media compatibility.

There are no internal soft sealing materials that may react with the media or deteriorate over time.

The E-11 features a flush diaphragm process connection. This flat sensing surface is specifically designed for the measurement of viscous fluids or media containing solids that may clog the NPT process connection.

The transmitters are engineered to meet Class I, Division 1 explosion-proof protection for installation in hazardous environments. Each transmitter undergoes extensive quality control testing and calibration to achieve a linearity of ≤ 0.25% full scale. In addition, each pressure transmitter is temperature compensated to assure accuracy and long-term stability even when exposed to severe ambient temperature variations.

Type N-10, N-11 Hazardous Area Non-incendive Transmitters

FM APPROVED

Applications

- Natural gas compressors
- Wellhead monitoring
- Pipeline pressure
- General industrial applications

Special Features

- FM approved non-incendive for Class I Division 2 hazardous locations
- Engineered to meet the harsh demands of gas compressor applications
- Does not require the use of intrinsically safe barriers
- NACE MR-01-75 compliant wetted parts
- 4-20 mA or low power 1-5 volt output signals available

Left: N-10 pressure transmitter with NPT connection
Right: N-11 flush diaphragm pressure transmitter

Description

Type N-10 pressure transmitters are specifically designed to meet the durability and performance requirements of gas compressor systems. These pressure transmitters feature an industry standard 4-20 mA 2 wire signal output, NEMA 4X (IP 67) weather protection and are extremely resistant to pressure spikes, vibration and moisture intrusion. NACE MR-01-75 compliance provides extra resistance against sulfide stress cracking when exposed to gases containing sulphur.

Type N-11 pressure transmitters feature a flat, non-clogging diaphragm. This is designed for use with viscous fluids or media containing particulates that could clog the pressure port of the standard NPT version.

The transmitters are engineered to meet Class I Division 2 non-incendive protection requirements in hazardous environments. Each undergoes extensive quality control testing and calibration to achieve a linearity of ≤ 0.25% full scale. In addition, each pressure transmitter is temperature compensated to assure accuracy and long term stability when exposed to severe ambient temperature variations.

Type N-11 Non-incendive Flush Diaphragm Pressure Transmitter Vacuum to 5,000 psi

Standard Features

- **Signal output:** 4-20 mA 2-wire or 1-5 V 3-wire
- **Supply voltage:** 10-30 DC (6-30 VDC for 1-5 V version)
- **Process connection:** G1B or G1/2B flush diaphragm depending on pressure range
- **Electrical connection:** 1/2" NPT male conduit with 6 foot cable

Type IS-20, IS-21, IS-20-F, IS-21-F
Intrinsically Safe Hazardous Area Transmitters

Applications

- Chemical, petrochemical
- Oil and gas refining
- Food industry
- Mechanical engineering

Special Features

- Pressure ranges from 50 InWC to 15,000 psi
- FM, CSA approval for
  - Intrinsically safe Class I, II and III Division 1, Group A, B, C, D, E, F, G
  - Dust Class II and III Division 1, Group E, F, G
  - Class I, Zone 0, AEx ia II C
- Ex- protection EEx ia I/II C T6 according to ATEX for:
  Gases, vapors and mist: Connection to Zone 0, Zone 1 and Zone 2
  Dust: Connection to Zone 20, Zone 21 and Zone 22
  Mining: Category M1 and M2
  Suitable for SIL 2 according to IEC 61508 / IEC 61511

Left: IS-20-S standard version
Center: IS-21-S with flush diaphragm
Right: IS-20-F with integral junction box

Description

Approvals meet international standards
The IS-20 series of intrinsically safe pressure transmitters are designed for industrial pressure measurement applications in hazardous areas where intrinsically safe ratings are required.

Multiple intrinsically safe approvals include FM, ATEX and CSA. These multiple approvals provide for global recognition and acceptance of the intrinsically safe ratings. The transmitters are labeled with all three approvals to help support international shipments of OEM equipment designed with these transmitters.

Rugged construction
The stainless steel wetted parts feature an all-welded measuring cell for improved media compatibility. There are no internal soft sealing materials that may react with the media or deteriorate over time. The compact case is also made of stainless steel and is available with environmental protection ratings up to NEMA 6 (IP 68).

The IS-21-S and IS-21-F transmitters feature a flush diaphragm process connection. They are specifically designed for the measurement of viscous fluids or media containing solids that may clog a NPT process connection.

Types IS-20-F and IS-21-F feature an integral stainless steel junction box with internal terminal block for use in extremely harsh environments. A ½“ NPT female conduit connection is standard on all models and a cable compression electrical connection is available as an option.

All types require a 10 to 30 volt supply provided by an intrinsically safe power supply or through an approved intrinsically safe zener diode barrier.

Specifications	Type IS-20-S, IS-21-S, IS-20-F, IS-21-F								
Specifications without type designation apply for all types.									
Pressure range	50 InWC	5 psi	10 psi	25 psi	30 psi	60 psi	100 psi	160 psi	200 psi
Maximum pressure*	15 psi	29 psi	58 psi	145 psi	145 psi	240 psi	500 psi	1,160 psi	1,160 psi
Burst pressure**	29 psi	35 psi	69 psi	170 psi	170 psi	290 psi	600 psi	1,390 psi	1,390 psi
Pressure range	300 psi	500 psi	1,000 psi	2,000 psi	3,000 psi	5,000 psi	8,000 psi	10,000 psi[1]	15,000 psi[1]
Maximum pressure*	1,160 psi	1,160 psi	1,740 psi	4,600 psi	7,200 psi	11,600 psi	17,400 psi	17,400 psi	21,750 psi
Burst pressure**	1,390 psi	5,800 psi	7,970 psi	14,500 psi	17,400 psi	24,650 psi[2]	34,800 psi[2]	34,800 psi	43,500 psi
{vacuum, gauge pressure, compound ranges, and absolute pressure references are available}									
[1] Ranges only available with Type IS-20									
[2] For Type IS-21 the burst pressure is limited to 21,000 psi unless the pressure seal is accomplished by using the sealing ring underneath the hex.									
*Pressure applied up to the maximum rating will cause no permanent change in specifications but may lead to zero and span shifts									
**Exceeding the burst pressure may result in destruction of the transmitter and possible loss of media									
Materials									
■ Wetted parts		(for other materials see WIKA diaphragm seal program)							
➢ Types IS-20-S, IS-20-F		Stainless steel							
➢ Types IS-21-S, IS-21-F		Stainless steel {Hastelloy® C4}							
		O-ring: NBR {Viton® or EPDM}							
■ Case		Stainless steel							
Internal transmission fluid [3]		Synthetic oil {Halocarbon® oil for oxygen applications} [4] {Listed by FDA for food applications}							
[3] Not available with Type IS-20 in pressure ranges > 300 psi									
[4] Media temperature for oxygen version: -4 ... +140 °CF (-20 ... +60 °C). Not available in vacuum or absolute pressure ranges or in Type IS-21 flush diaphragm version > 500 psi									
Power supply U_B	DC V	10 < U_B ≤ 30 (11 < U_B ≤ 30 with Type IS-20-F)							
Signal output and		4 ... 20 mA, 2-wire							
Maximum load R_A									
➢ Types IS-20-S		R_A ≤ (U_B – 10 V) / 0.02 A – (length of cable in feet x 0.043 Ohm)							
➢ Types IS-20-F		R_A ≤ (U_B – 11 V) / 0.02 A							
		with R_A in Ohms and U_B in Volts							
Test circuit signal / max. load R_A		R_A < 15 Ohm (only for Type IS-20-F)							
Adjustability zero/span	%	± 5 using potentiometers inside the instrument							
Response time (10 ... 90 %)	ms	≤ 1 (≤ 10 ms at media temperatures below –22°F (-30°C) for ranges < 300 psi							
Power Pi	W	1 (750 mW with approval for Category 1D)							
Isolation voltage		Isolation complies with EN 50020, 79-11							
Accuracy [5]	% of span	≤ 0.25 {0.125} [6] (BFSL)							
	% of span	≤ 0.5 {0.25} [6] (limit point calibration)							
[5] Including non-linearity, hysteresis and repeatability. Limit point Calibration performed in vertical mounting position with pressure connection facing down.									
[6] For pressure ranges above 100 InWC									
Non-linearity	% of span	≤ 0.2 (BFSL) according to IEC 61298-2							
Non-repeatability	% of span	≤ 0.1							
1-year stability	% of span	≤ 0.2 (at reference conditions)							
Permissible temperature									
■ Medium [7] [8]		-20 ... +80 °C [7]					-4 ... +176 °F [7]		
		{extended temperature ranges see page 6} [7]							
■ Ambient [7] [8]		-20 ... +80 °C [7]					-4 ... +176 °F [7]		
■ Storage [8]		-30 ... +105 °C					-22 ... +221 °F		
[7] Other temperature ranges are possible, depending on the electrical connection; see EC-type									
[8] Also complies with EN 50178, Tab. 7, Type C, Class 4KH Operation, 1K4 Storage, 1K3 Transport									
[9] Response time for IS-20: ≤ 10 ms at medium temp. below -30 °C (-22 °F) for pressure ranges up to 300 psi Response time for IS-21: ≤ 10 ms at medium temp. below -30 °C (-22 °F) for all pressure ranges									
Compensated temperature range		32 ... +176°F				0 ... +80°C			
Temperature coefficients (TC) within compensated temperature range:									
■ Mean TC of zero	% of span	≤ 0.2 / 10 K (< 0.4 for pressure range ≤ 100 InWC)							
■ Mean TC of range	% of span	≤ 0.2 / 10 K							
CE-conformity									
■ Pressure equipment directive		97/23/EC							
■ EMC directive		2004/108/EC, EN 61 326 Emission (Group 1, Class B) and Immunity (industrial locations)							

Specifications		Type IS-20-S, IS-21-S, IS-20-F, IS-21-F
■ Directive ATEX of equipment intended for use in potentially explosive atmospheres		94/9/EC
Ex-protection	ATEX	Category [8] 1G, 1/2G, 2G, 1D, 1/2D, 2D, M1, M2

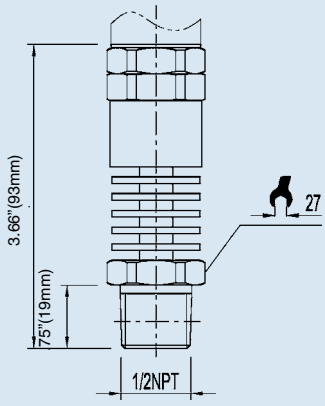
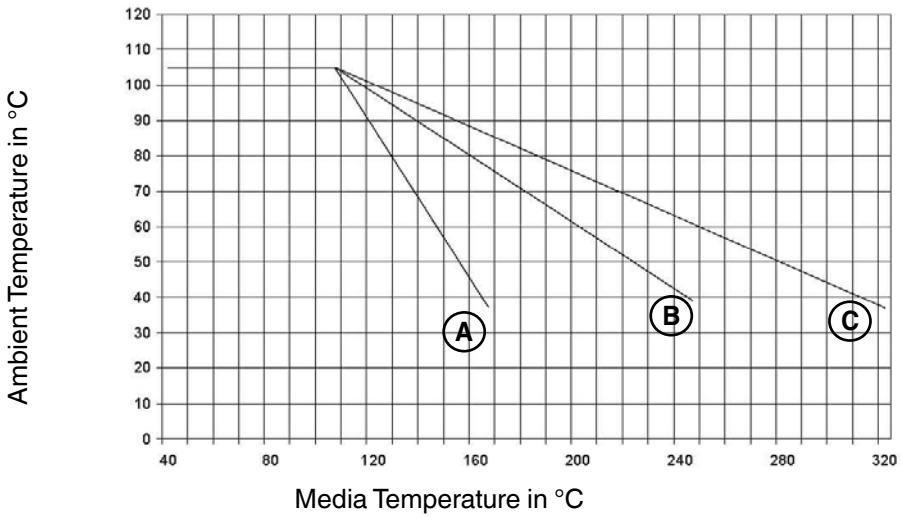
Order code: ND and 9



Relationship of media temperature to ambient temperature



Version	Ⓐ	Ⓑ	Ⓒ
Cooling fins	2	3	5
K *	0.47	0.68	0.76

*cooling constant specific to each version

Calculation of cooling element performance:
$T_B = T_{med} - (T_{med} - T_{amb}) \times K$
T^B = Operating temperature of transmitter
T^{med} = maximum temperature of process media
T^{amb} = maximum ambient temperature
K = Constant of cooling element

Maximum permissible ambient temperature:
$T_{amb} = T_{med} + (T_B - T_{med}) / K$

Permissible temperature ranges depending on electrical connections

Type LS-10, LH-10 Submersible Liquid Level Transmitters

Applications

- Level measurement in water and wastewater treatment plants, wells, holding tanks, wet wells, rivers

Special Features

- Ranges from 50 InWC to 400 psi
- Rated IP 68 for permanent submersion
- Hastelloy® case available for aggressive media
- 4-20 mA 2-wire output signal, others available
- Lightning protection available
- Cable supports over 220 pounds of strain

Description

The LS-10 liquid level transmitter is designed for economical and reliable performance in a wide variety of level measurement applications. The LS-10 provides a signal output of 4-20mA and an accuracy of 0.25% of span. Standard stocked pressure ranges are assembled with any length cable for fast delivery.

The high performance type LH-10 provides 0.125% accuracy and is available with many custom features for special requirements. LH-10 options include lightning protection, temperature measurement, special output signals, plus FEP cable and Hastelloy® construction for aggressive media.

The LH-10 is available with a low power 0.5-2.5V output signal and 5VDC supply voltage. This is ideal for solar or battery powered installations.

The LH-10 includes a dual cable entry design that prevents ingress of moisture into the electronics even if the cable is damaged. Both types feature watertight vented cable that can withstand over 220 pounds of strain. This allows the transmitter to be supported without any additional cabling.

Compensation for atmospheric pressure changes is accomplished through a vent tube in the cable. Many accessories, including cable clamps, desiccant drying cartridges, additional weights, and junction boxes are available for specific installation requirements. Both models can be equipped with the LevelGuard attachment for protection in difficult environments.

Left: LS-10 level transmitter
Center: LH-10 high performance level transmitter
Right: LH-10 with optional Hastelloy case and FEP cable

Optional WIKA LevelGuard Anti-clog attachment for submersible level transmitters. For use in lift stations, wet wells and other difficult level applications. For more information request bulletin LG-1.

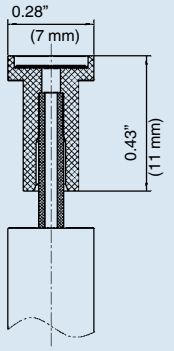
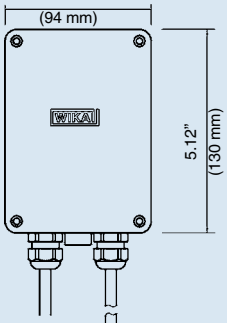
Accessories

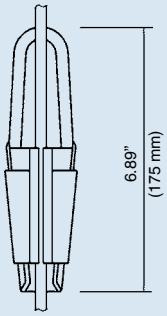
Dimensions in inches (mm)



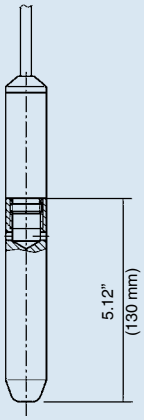
Vent tube filter Part# 7193131
The optional Teflon® vent tube filter protects the vent opening and protects against the entry of dirt and moisture. .



Cable junction box Part# 2459686
The cable junction box is rated NEMA 4 / IP 67 and is suitable for mounting outside tanks or shafts or inside dry control boxes. Can be wall or DIN rail mounted.

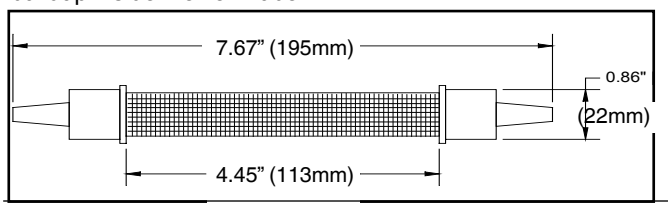


Cable clamp Part# 2074257
The cable clamp secures the cable without bending or kinking that can damage the cable vent tube or outer jacket.

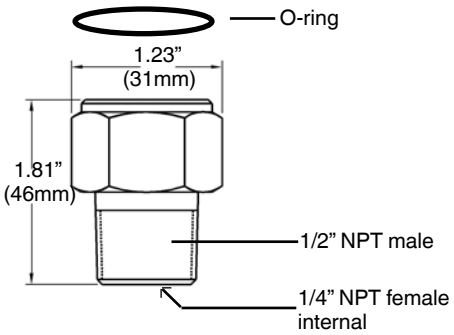


Additional weight Part# 1524399
The additional weight replaces the protective cap and helps to stabilize the transmitter in turbulent conditions. Weight: approximately 1.1 lb, 316 SS.

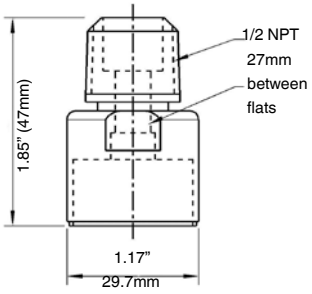
Desiccant drying cartridge Part # 9836700
The desiccant drying cartridge helps prevent moisture buildup inside the vent tube.



NPT adapter Part# 1631322
The 316 SS G1/2 adapter replaces the removable protective cap and converts the threads to 1/2"NPT male external, 1/4" female internal threads. Includes O-ring.



Conduit adapter Part# 50476114
316 SS 1/2" NPT male cable conduit adapter.
Must be factory installed.



LevelGuard Anti-clog attachment Part # 50077091

The stainless steel LevelGuard attachment must be factory installed and calibrated.

Type LH-20 High-Performance Submersible Liquid Level Transmitters

Applications

- Deep well and borehole measurements
- Groundwater monitoring
- Level measurement in open bodies of water
- Sewage lift and pumping stations
- Settling ponds and rainwater basins

Special Features

- Slender design
- Adjustable turndown (option)
- Resistant against the harshest environmental conditions
- Reliable and secure by double-sealed design
- Titanium case for especially high resistance (option)

Submersible pressure transmitter model LH-20
Fig. left: from stainless steel
Fig. right: from titanium

Description

For the most demanding measurement tasks
The model LH-20 submersible pressure transmitter has been designed for the most demanding of level measurement tasks. A slender design, highest accuracies, low temperature errors and an adjustable measuring range ensure the suitability of the LH-20 for all submerged level measurements.

The model LH-20 submersible pressure transmitter can adapt to countless applications and measuring media through a large number of features and options. Depending on the requirements, this level probe is available with, amongst other things, a titanium case, PUR/PE/FEP cable, 0.1 % accuracy, HART®, scaleability or parallel temperature output signal.

For operation in hazardous environments, the model LH-20 submersible pressure transmitter is also available in an intrinsically safe version. For potable and fresh water applications, a potable water conformant product variant is possible in accordance with KTW and ACS.

Hermetically sealed, robust and durable
The model LH-20 submersible pressure transmitter has been engineered for use in the harshest environments. Through a double, redundant sealing concept, it is permanently hermetically sealed. A robust design from stainless steel or titanium, with a spring-reinforced cable seal, ensures a long service life, even under the big mechanical loads of installation and continuous use.

Designs with the highest media resistance using FEP cable and titanium cases, along with the integrated lightning protection, guarantee the longevity of the submersible pressure transmitter even under the most adverse environmental influences in aggressive media, in both indoor and outdoor use.

The given measuring ranges are also available in mbar, kPA and MPa.

Output signals

Output signal	
Standard	**4 ... 20 mA**
Option	**4 ... 20 mA and HART® signal, additional Pt100 measurement signal**

Load in Ω

- 4 ... 20 mA:
  ≤ (power supply - 8 V) / 0.022 A
- 4 ... 20 mA and HART® signal:
  ≤ (power supply - 9.6 V) / 0.022 A

Voltage supply

Power supply

The power supply depends on the selected output signal.

- 4 ... 20 mA: DC 8 ... 36 V
- 4 ... 20 mA and HART® signal: DC 9.6 ... 36 V

When being operated in Ex areas, the submersible pressure transmitter must be powered via an Ex isolated barrier.
For Ex isolated barrier see "Accessories"

Additional Pt100 measuring element

The HART® version has an additional Pt100 measuring element for measuring the temperature of the medium.

Specifications:

- Pt100 per DIN EN 60751
- Measuring range -50 ... +100 °C
- Resolution of 1 °K

Reference conditions

Temperature
15 ... 25 °C

Atmospheric pressure
860 ... 1,060 mbar

Humidity
45 ... 75 % relative

Mounting position
Calibrated in vertical mounting position with pressure connection facing downwards.

Accuracy data

Non-linearity at reference conditions

Non-linearity	
Standard	≤ ±0.2 % of span
Option	≤ ±0.1 % of span

By setting a turndown of greater than 5:1, the non-linearity is decreased.

Determined using the limit point method in accordance to IEC 60770

Temperature error of the zero point in the temperature range 0 ... 80 °C

- at non-linearity ≤ 0.2 % of span
  - Standard, without turndown ≤ 0.15 % of span/10 K
  - Turndown ≤ 5:1 ≤ 0.20 % of span/10 K
  - Turndown > 5:1 ≤ 0.25 % of span/10 K

- at non-linearity ≤ ± 0.1 % of span
  - Standard, without turndown ≤ 0.05 % of span/10 K
  - Turndown ≤ 5:1 ≤ 0.10 % of span/10 K
  - Turndown > 5:1 ≤ 0.15 % of span/10 K

Long-term drift
≤ 0.1 % of span/year

Settling time (0 ... 63 %)
Depending on the output signal the following settling times apply:

- 4 ... 20 mA: 100 ms
- 4 ... 20 mA, HART® signal: 200 ms

Scalability (turndown)
The HART® version enables turndown to be set.

It is recommended that turndown is not set to over 5:1, since the accuracy can decrease dependant on the scaling.

Operating conditions

Ingress protection (per IEC 60529)
IP 68

Vibration resistance (per IEC 60068-2-6)
4 g (at 5 ... 100 Hz)

Lightning protection
Nominal discharge current ≥ 5 kA, response time < 25 ns

Explosion protection (optional)
The model LH-20 submersible pressure transmitter is available with the following Ex approvals, which can be ordered separately.

Approval
ATEX II 1G, 2G Ex ia IIC T6
IECEx ia IIC T6

Temperatures

- for use without explosion protection

  The permissible temperature ranges are dependent on the cable material used:

  - Medium
    - PE cable: - 40 ... +60 °C
    - PUR cable: - 40 ... +80 °C
    - FEP cable: - 40 ... +80 °C

  - Ambient
    - PE cable: - 40 ... +60 °C
    - PUR cable: - 40 ... +85 °C
    - FEP cable: - 40 ... +85 °C

  - Storage
    - PE cable: - 40 ... +80 °C
    - PUR cable: - 40 ... +80 °C
    - FEP cable: - 40 ... +80 °C

- for use as Category 1G equipment

  - Ambient
    - Temperature class T6: - 20 ... +50 °C
    - Temperature class T1 ... T5: - 20 ... +60 °C

- for use as Category 2G equipment

  - Ambient
    - Temperature class T6: -40 ... +66 °C
    - Temperature class T1 ... T5: -40 ... +80 °C

Maximum tensile force on the cable
1,200 N

Weight

- Submersible pressure transmitter: approx. 370 g
- Cable: approx. 100 g/m
- Additional weight (accessories): approx. 350 g

Process connections

The model LH-20 is available in two process connection variants:

Process connection	
Standard	M14 x 1 with protective cap
Option	Flush measuring cell

Electrical connections

Reverse polarity protection
U_+ vs. U-

Overvoltage protection
see lightning protection under "Operating conditions"

Cable lengths
Cable length to customer requirements, freely selectable

Approvals, directives and certificates

Approvals and certificates
On request, the submersible pressure transmitter can be supplied with the following approvals and certificates:

Available approvals
ATEX (explosion protection in accordance with ATEX)
IECEx (explosion protection in accordance with IECEx)
GL (Germanischer Lloyd)

Available certificates
Drinking water declaration of conformity in accordance with KTW and ACS
Test certificate [1]

1) The test certificate documents the product-specific instrument specifications and include a detailed listing of the individual measured values of the acceptance test.

CE conformity

- Outputsignal 4 ... 20 mA:
  EMC directive 2004/108/EC, EN 61326 emission (group 1, class B) and interference immunity (industrial application)
- Outputsignal 4 ... 20 mA and HART® signal:
  EMC directive 2004/108/EC, EN 61326 emission (group 1, class A) and interference immunity (industrial application)
- ATEX 94/9/EG (option)

Materials (wetted)

Case	
Standard	Stainless steel 316L
Option	Titan

Cable material	
Standard	PUR
Option 1	PE
Option 2	FEP

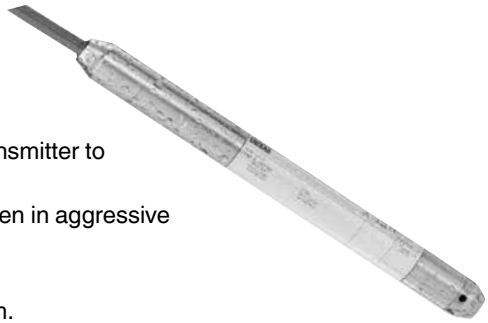
Sealing material [1]	
Standard	FKM
Option	EPDM

1) The model LH-20 is double sealed behind the sensor.

Additional weight	
Standard	Stainless steel 316L
Option	Titan

Sensor
Ceramic Al_2O_3 96 %

Titanium for especially high resistance (option)



For a particularly high resistance against aggressive media, the model LH-20 submersible pressure transmitter is available with a titanium case.

This exceptionally high-quality material enables the submersible pressure transmitter to be used under the most adverse conditions.
The highly chemically-resistant titanium design ensures a long service life, even in aggressive media and the most demanding applications.

The additional weight, available as an accessory, is also obtainable in titanium.

Dimensions in mm

Submersible pressure transmitter model LH-20

with flush measuring cell

with M14 x 1 process connection and protection cap

Accessories

	Description	Order number
	**Cable strain relief clamp** The cable strain relief clamp enables easy and secure mechanical fastening of the submersible pressure transmitter's cable at the measuring point. It acts as a guide for the cable, in order to avoid mechanical damage and to reduce the tensile stress.	14052336
	**Additional weight** The additional weight increases the dead weight of the submersible pressure transmitter. It simplifies the lowering into monitoring wells, narrow shafts and deep wells. It effectively reduces negative environmental influences on the measuring result from the measured medium (e.g. turbulent flow). The additional weight is available in two variants: ■ Stainless steel 316L, approx. 350 g, length 120 mm ■ Titanium, approx. 350 g, length 214.5 mm It is recommended that the design of the additional weight is selected in line with the case material of the submersible pressure transmitter.	 14052322 (316L) 14052330 (Titanium)
	**Terminal box** The terminal box, with IP 67 ingress protection and watertight ventilation element, provides a moisture-free electrical termination for the submersible pressure transmitter. It should be mounted in a dry environment, outside any shafts or vessels, or directly in the switch cabinet.	14052339
	**Ex isolated barrier** Ex isolated barrier, power supply DC 20 ... 32 V, output: max. DC 25.4 V, max. 88.2 mA	2341268
	**Display module DIH52 and DIH62** 5-digit display, 20-segment bargraph, without separate power supply, with additional HART® functionality. Automatic adjustment of measuring range and span. Secondary-master functionality: Setting the measuring range and unit of the connected transmitter using HART® standard commands possible. Optionally explosion protection per ATEX.	on request
	**HART® modem with USB, RS-232 or Bluetooth® interface** For scaling the measuring range using a PC via the HART® protocol, a HART® modem with USB, RS-232 or Bluetooth interface is available. The modem communicates with all registered HART® field devices and can be used with the most popular HART® compatible software programs.	7957522 (RS-232 interface) 11025166 (USB interface) 11364254 (Bluetooth® interface)

VentGuard Cable Protection Kit

Applications

- Protects the vent tube of submersible pressure transmitters from moisture

Special Features

Protection Kit includes the following:

- NEMA 4 / IP 67 cable junction box with transparent polycarbonate cover
- Teflon® vent tube filter
- Reusable desiccant canister regenerates in microwave
- 7 position screw terminal block

Description

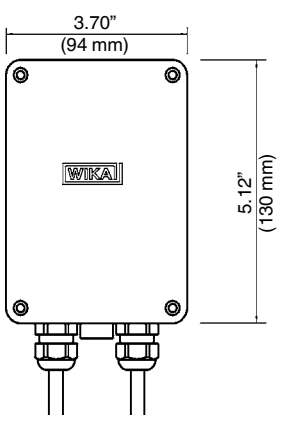
Submersible transmitter cables contain a vent tube that allows the transmitter to automatically compensate for changes in barometric pressure. This tube leads to the back of the sensor inside the transmitter. The transmitter may become damaged if moisture enters this tube.

The submersible cable protection kit is designed for applications where humidity or moisture is present.
It should be mounted in a location that will never be submerged. The NEMA 4X junction box features a transparent cover that allows easy viewing of the desiccant canister. The indicating silica gel in the canister changes color from blue to pink when canister regeneration is needed.

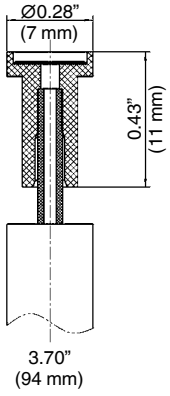
The canister can be regenerated by placing on its end in a microwave oven for approximately two minutes.

A Teflon® vent tube filter provides additional protection against dirt and moisture entering the vent tube.

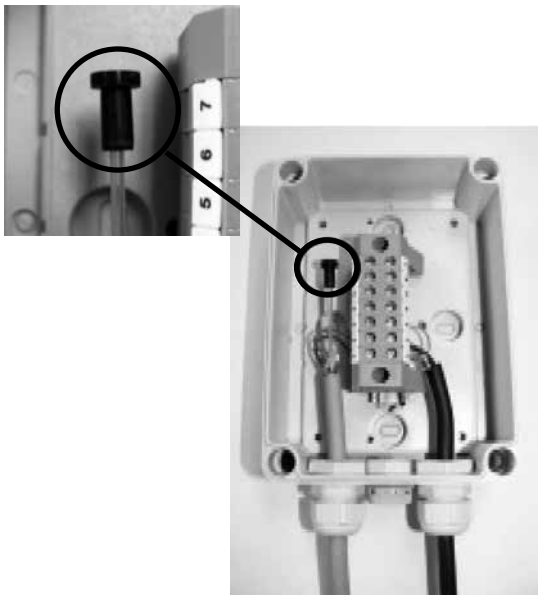
Two compression fittings accommodate the submersible cable entry on one side and standard cable for the exit side.



NEMA 4X junction box with clear cover



Slip-on vent tube filter



The Cable Protection kit includes a teflon vent tube filter protector that slides on to the vent tube after the submersible cable is installed in the junction box. The terminal strip can be oriented vertically or horizontally as required for the application.

Blue = active desiccating canister

Pink = canister regeneration required

The reusable desiccating canister is visible through the plastic cover of the junction box. The canister will adsorb moisture and help keep the air in the junction box dry. When the indicating silica gel changes color from blue to pink the canister can be regenerated.

To regenerate, remove the canister from the junction box. Stand the canister on its end in a microwave oven and microwave on high for about two minutes. Microwave for an additional minute if necessary until the canister contents turn blue. Caution: the canister will be extremey hot when removed from the microwave and should be handled with care. Allow to cool completely before reinstalling inside the junction box.

Type LS-10 Submersible Liquid Level Transmitter 100 InWC to 100 psi

Standard Features

- **Signal output:** **4-20 mA 2-wire**
- **Supply voltage:** **10-30 VDC**
- **Process connection:** **G1/2B with removable protective cap**
- **Electrical connection:** **Vented polyurethane cable (must specify length)**

Important Ordering Instructions: Specify the **level transmitter part number** and **cable length part number** corresponding to the total required cable length. For example, a 100 InWC level transmitter with 40 feet of cable should be ordered as 4262761 / 4347931.

Pressure range part number AND cable length part number must be specified on every order!

Type IL-10 Intrinsically Safe Submersible Liquid Level Transmitter for Hazardous Environments

Applications

- Level measurement in hazardous areas
- Refineries
- Distilling equipment
- Painting plants
- Filling equipment for combustible gases
- Overfilling systems on tank vehicles, bore holes, waste water plants (biogases from sewage), etc.

Special Features

- Pressure ranges from 50 InWC to 400 psi
- Ex- protection EEx ia I/II C T6 according to ATEX
- Applicable in all hazardous environments:
  Gases and vapor: Zone 0, Zone 1 and Zone 2
  Dusts: Zone 20, Zone 21 and Zone 22
- Cable supports over 220 pounds of strain
- Ingress protection IP 68 for submersion to 1000 feet

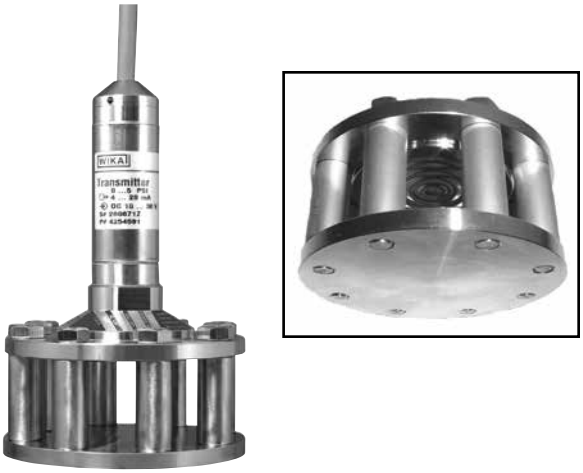
Fig. Intrinsically safe IL-10 level transmitter

Description

The IL-10 intrinsically safe level transmitter is designed for use in a wide variety of level measurement applications. The IL-10 provides a BFSL accuracy better than 0.25% of span and an output signal of 4-20mA.

The IL-10 has FM, ATEX and CSA approvals for installation in hazardous areas when used with the appropriate intrinsically safe zener barrier. The cable can withstand up to 220 pounds of strain, also, no additional cable support is required.

The IL-10 includes a dual cable entry design that prevents ingress of moisture into the electronics even if the cable's outer jacket is damaged. Compensation for changes in barometric pressure is accomplished through a vent tube in the cable. Many accessories, including cable clamps, drying cartridges and junction boxes are available for specific installation requirements.



Optional WIKA LevelGuard Anti-clog attachment for submersible level transmitters. For use in lift stations, wet wells and other difficult level applications.

Type MH-2 Special Purpose Pressure Transmitters for Mobile Hydraulic Applications

Applications

- Mobile hydraulic systems
- Load monitoring

Special Features

- Pressure ranges from 100 psi to 8,000 psi
- 4-20 mA, 1-5V, 0-10V, 0.5-4.5V ratiometric outputs available
- Durable thin film sensor technology
- CDS system for protection from pressure spikes and cavitation
- IP 69K high pressure steam wash-down protection available
- MTTF values > 100 years

MH-2 pressure transmitters

Description

MH-2 pressure transmitters are precision engineered for off road and mobile hydraulic applications where performance and durability are critical. Extreme shock and vibration resistance, available high pressure steam wash-down protection and the WIKA CDS system (cavitation dampening system) provide one of the most rugged pressure transmitters available today. Pressure ranges from 1,000 psi to 8,000 psi meet all standard mobile hydraulic pressure applications.

The all-welded thin film measuring cell eliminates the need for additional soft sealing materials that may deteriorate over time. The thin film sensor uses sputtered technology that provides excellent long-term stability in applications producing frequent pressure cycles. The rugged glass reinforced PBT plastic case has been used in under hood automotive applications for many years.

A metal sleeve inside the case provides excellent EMI protection to 100v/m. Several NEMA 4 / IP 67 electrical connections are available. The cable version provides environmental protection to IP 69K for resistance to high-pressure steam wash-down cleaning procedures.

The MH-2 is specifically designed for OEM applications in the mobile hydraulics and automotive industry. It is manufactured on a fully automated production line to provide large quantities of transmitters with consistent quality and highly competitive pricing.

Custom modifications are available for large quantity requirements.

Specifications Type MH-2

Pressure range	-30 InHG/100 psi	-30 InHG/100 psi	100 psi	150 psi	250 psi	300 psi	500 psi
Maximum pressure*	1,740 psi	2,900 psi	290 psi	464 psi	725 psi	725 psi	1,160 psi
Burst pressure**	7,970 psi	11,600 psi	1,450 psi	2,320 psi	3,625 psi	3,625 psi	5,800 psi
Pressure range	1,000 psi	1,500 psi	2,000 psi	3,000 psi	5,000 psi	17,500 psi	8,000 psi
Maximum pressure*	1,740 psi	2,900 psi	4,600 psi	7,200 psi	11,600 psi	17,400 psi	17,400 psi
Burst pressure**	7,970 psi	11,600 psi	14,500 psi	17,400 psi	26,500 psi	34,800 psi	34,800 psi

*Pressure applied up to the maximum rating will cause no permanent change in specifications but may lead to zero and span shifts

**Exceeding the burst pressure may result in destruction of the transmitter and possible loss of media

Type UT-10, UT-11 UniTrans® Universal Pressure Transmitters

Applications

- Process engineering
- Chemical engineering
- Plant construction

Special features

- Scaleable measuring ranges via turndown of up to 1 : 20
- Measuring range from 0 ... 5 mbar up to 0 ... 4,000 bar
- High measuring accuracy
- Fully welded, stainless steel diaphragm
- Multifunction display

Left - UT-11
Right - UT-10

Description

Turn Down
With its maximum 1 : 20 turndown ratio the UniTrans® can be used in many different applications. This turndown ratio eliminates the necessity of keeping several transmitters in stock; it is much easier to turn down the transmitter instead of changing transmitters (e.g. a 100 bar transmitter can be turned down to 5 bar).

High measuring accuracy
The internal, digital signal processing allows for high measuring accuracy at fast measuring rates and pressure ranges from 5 mbar to 4,000 bar.

Multifunction display
The optional display can be adjusted mechanically and electronically, thus guaranteeing many display variations and an optimal reading from different directions. Bar graph and trend are permanently displayed. Only a minor modification of the case is required in order to be able to read the display from above. All standard units can be displayed. Two further lines are available for entering additional text (e.g. min./max. values or temperature at the sensor).

Configuration
With the easy-to-use menu, the user can set parameters such as language, unit, zero point, span or inverted signal. The UniTrans® can be used for linearization with up to 32 set points.

Signal
The UniTrans® is fed with an input power of DC 12 ... 36 V. The output signal is 4 ... 20 mA, 2-wire system. The user can program an inverted signal 20 ... 4 mA or damping (up to 40 seconds).

Specifications		Type UT-10, standard version Type UT-11, flush diaphragm						
Pressure ranges [1] *	0.4 bar	1.6 bar	6 bar	16 bar	40 bar	100 bar	250 bar	600 bar

Burst pressure	3,000 bar	4,000 bar	5,000 bar	7,000 bar				
		{Vacuum, gauge pressure, compound range, absolute pressure are available}						
Materials								
■ Wetted parts		(other materials see WIKA diaphragm seal program)						
➢ Type UT-10		Stainless steel (pressure ranges > 16 bar additional Elgiloy®)						
➢ Type UT-11		Stainless steel {Hastelloy® C4}; O-ring: NBR [4] {FPM/FKM or EPDM}						
■ Case		Highly resistive, fiberglass-enforced plastic (PBT); {Aluminum}						
Internal transmission fluid [5]		Synthetic oil {Halocarbon® oil for oxygen applications} {Listed by FDA for Food & Beverage}						
Power supply U_B	DC V	$12 < U_B \leq 36$						
Signal output		4 ... 20 mA, 2-wire						
Permissible max. load R_A		$R_A \leq (U_B - 12\ V) / 0.023\ A$ with R_A in Ohm and U_B in Volt						
Adjustability								
■ Zero point	%	-2.5 ... 99						
■ Span		Turndown of 1 : 20 (1 : 2 for pressure ranges > 1,000 bar)						
Internal measuring rate	Hz	100						
Accuracy	% of span	≤ 0.1 [6] (≤ 0.3 for pressure ranges 1,000 bar)						
Behavior with turndown (1 : k)								
■ turndown of up to 1 : 5		No change of accuracy						
■ turndown of 1 : 5 to 1 : 20		The accuracy must be multiplied by the factor (k / 5) [Calculation example for TD = 1 : 15] Accuracy = 0.1 x (15 : 5) = 0.3						
Non-linearity	% of span	≤ 0.05 (≤ 0.2 for pressure ranges > 1,000 bar); (BFSL) per IEC 61298-2						
1-year stability	% of span	≤ 0.1 (at reference conditions)						
Overall deviation	%	at +10 ... +40 °C ≤ 0.15 (≤ 0.5 for pressure ranges > 1,000 bar)						
Permissible temperature of								
■ Medium *	°C	-30 ... +105 (G 1 ½ up to 30 min 140°C at an ambient temperature of < 50 °C) -30 ... +150 (G 1 according to EHEDG with cooling element)						
■ Ambience	°C	-40 ... +85 [7] (-20 ... +70 with display)						
■ Storage	°C	-40 ... +85 (-35 ... +80 with display)						
Compensated temp. range	°C	-20 ... +80						
Temperature coefficients within compensated temp range		(the temperature related deviations in the range +10 ... +40 °C included in the overall deviation)						
■ Mean TC of zero	% of span	≤ 0.1/ 10 K						
■ Mean TC of range	% of span	≤ 0.1 / 10 K						
Damping	s	display and signal: 0 ... 40 (adjustable)						
CE-conformity								
■ Pressure equipment directive		97/23/EG (Module H)						
■ EMV directive		2004/108/EG, EN 61326 Emission (Group 1, Class B) and immunity (industrial locations)						
Shock resistance	g	100 per IEC 60068-2-27 (mechanical shock)						
Vibration resistance	g	5 per IEC 60068-2-6 (vibration under resonance)						
Wiring protection		Protected against reverse polarity, short circuiting and {overvoltage} on the instrument side						
Weight	kg	approx. 0.7 {Aluminum version approx. 1.0}						

{ } Items in curved brackets are optional extras for additional price.
*) In an oxygen version model UT-11 is not available. In an oxygen version model UT-10 is only available in gauge pressure ranges from 0.4 bar up to max. 1000 bar and with media temperatures between -20 … +60 °C / -4 … +140 °F.
1) Other measuring ranges (e. g. 4 bar) can be set via the respective Turn down. Even when the measuring range is present by us on (e. g. 4 bar) the standard range of (6 bar) can be set again by a reset.
2) Only Type UT-10.
3) For Type UT-11: the value specified in the table applies only when sealing is accomplished with the sealing ring underneath the hex. Otherwise max. 1500 bar applies.
4) O-ring made of FPM/FKM {EPDM} for Model UT-11 with integrated cooling element.
5) Not for UT-10 with pressure ranges > 25 bar
6) Including non-linearity, hysteresis, non-repeatability, zero point and full scale error (corresponds to error of measurement per IEC 61298-2). Adjusted in vertical mounting position with lower pressure connection.
7) -40 °C only with Aluminium case.

Type HP-2 Pressure Transmitter for High Pressure Applications up to 15,000 bar

Applications

- Test benches
- Water jet cutting
- High pressure pasteurisation
- High pressure cleaning

Special Features

- Pressure ranges up to 15,000 bar
- Accuracy 0.5 %
- Output: 4 ... 20 mA, 0 ... 10 V, etc.
- Electrical connection: DIN 175301-803 A L-connector, M12x1 circular connector, flying leads, etc.
- Pressure connections: M16x1.5 female, M20 x1.5 female, 9/16-18 UNF female F250-C

Left - HP-2 w/M12x1 electrical connection
Right - HP-2 w/DIN electrical connection

Description

The pressure transducer HP-2 is designed for superior high pressure applications up to 15,000 bar.

HP-2 provides a very high long-term stability and a very good accuracy.

Due to its excellent life cycle behaviour HP-2 offers an extra long service life also for dynamic pressure curves.

The optional cavitation and peak pressure protection has been developed especially for highly dynamic pressure curves. It provides an extended operating time even in demanding applications.

Specifications — Type HP-2

Pressure ranges	bar	1,600	2,500	4,000	5,000	6,000	7,000	8,000	10,000
Over-pressure safety	bar	2,300	3,500	5,000	6,000	7,000	8,000	10,000	11,000
Burst pressure	bar	4,000	6,000	8,000	10,000	11,000	11,000	12,000	12,000
Pressure ranges	psi	23,000	36,000	58,00	72,000	87,000	100,000	115,000	145,000
Over-pressure safety	psi	33,300	50,500	72,500	87,000	101,500	116,000	145,000	159,500
Burst pressure	psi	58,000	87,000	116,000	145,000	159,500	159,500	174,000	174,000
			Up to 15,000 bar / 217,000 psi on request.

Type P-30, Type P-31 Precision Pressure Transmitter

Applications

- Test benches
- Calibration technology
- Laboratories and maintenance shops
- Machine building

Special Features

- 0.1% accuracy with no additional temperature error between 50 ... 140 °F (10 ... 60°C)
- 0.05% accuracy available
- 1 kHz measuring rate for fast data acquisition
- Space saving, compact design
- Internal USB interface connection for calibration and adjustment

Type P-30 Precision pressure transmitter

Description

High precision

The P-30 provides non-linearity of up to 0.04% of span (B.F.S.L.) for precise measurement in critical applications. Each instrument is provided with a test report at no additional cost. Other test certificates are available.

Fast digital data processing

Active temperature compensation of the P-30 is provided by microprocessor-controllled digital signal processing and internal temperature measurements. There is no additional temperature error between 50 ... 140 °F (10 … 60 °C). The advanced digital processing circuity provides a measuring rate of up to 1 ms and is comparable to analog output pressure transmitters.

The P-30 can be quickly and easily calibrated using the internal USB service interface and optional EasyCom 2009 configuration software. The software also provides for zero and span point adjustments.

Compact design

The robust, compact design allows the P-30 to be installed into standard 19“ test racks or cabinets with limited space.

Many optional features

Pressure ranges are available from 100 INWC to 15,000 PSI. Vacuum, absolute, compound and other engineering units are available to meet specific requirements. A variety of electrical, process connections, and signal outputs are also available.

The P-31 features a flat, non-clogging flush diaphragm for use with slurries or crystallizing media that may clog the orifice of the P-30.

Specifications	Type P-30, P-31									
Pressure ranges	100 InWC	5 psi	10 psi	15 psi	25 psi	30 psi	60 psi	100 psi	160 psi	250 psi

Type R-1 Refrigeration and Air Conditioning Pressure Transmitter

Applications

- Refrigeration and air conditioning applications
  - Compressor suction and discharge pressure
  - Compressor staging
  - Condenser fan controls
  - Chiller systems

Special Features

- Stainless steel wetted parts
- Compact design is shock and vibration resistant
- Compatible with all common refrigerants
- Condensation proof

Left: **R-1 with M 12x1**
Center: **R-1 with Metri Pack 150**
Right: **R-1 with cable**

Description

Refrigeration and Air Conditioning applications
The R-1 pressure transmitter is designed for the special requirements of refrigeration and HVAC applications. The all welded stainless steel measuring cell eliminates the need for soft sealing materials between the sensor and process connection. This qualifies the R-1 for use with all typical refrigerants including chlorofluorocarbons R12, R22, R123, R134a and ammonia.

Excellent performance and reliability
The R-1 provides a linear amplified output with short circuit, reverse polarity and overvoltage protection.
The hermetically welded, dry, thin-film measuring cell provides long-term leak resistance. In addition, the sputtered stainless steel measuring cell features excellent long-term stability and an extremely high burst pressure.

Economical price, high performance
Production on highly flexible manufacturing lines provides a very attractive price to performance ratio for large production runs.

Specifications		Type R-1			
Pressure ranges	100 psi[1]	150 psi	200 psi	300 psi	600 psi	850 psi
Over-pressure safety	300 psi	300 psi	480 psi	750 psi	1,200 psi	1,500 psi

Type AC-1 Refrigeration and Air Conditioning Pressure Transmitter

Applications

- Refrigeration and air conditioning applications
  - Heat pumps, central air conditioners
  - Compressors
  - Chillers

Special Features

- Brass, CR70 (polychloroprene) and ceramic wetted parts
- Compatible with most refrigerants
- Condensation proof

Left: **AC-1 with M 12x1**
Center: **AC-1 with Metri Pack 150**
Right: **AC-1 with cable**

Description

Refrigeration and HVAC applications
The new AC-1 pressure transmitter uses an integrated thick film ceramic pressure sensor to meet the price and performance requirements of commercial and OEM HVAC and refrigeration applications.

The wetted parts include ceramic, brass and a polychloroprene (Neoprene®) sealing ring. These materials are compatible with most common refrigerants.

Performance and reliability
The AC-1 provides a linear, amplified voltage or milliamp signal output with short circuit, reverse polarity and overvoltage protection. The AC-1 was tested using strict protocols designed specifically for the refrigeration and HVAC industry. It meets or exceeds all test requirements including resistance to high pressure steam jets, condensation, dust tightness and icing.

Economical price with high performance
Assembly on highly flexible manufacturing lines provides a cost effective transmitter for both small and large quantity production runs.

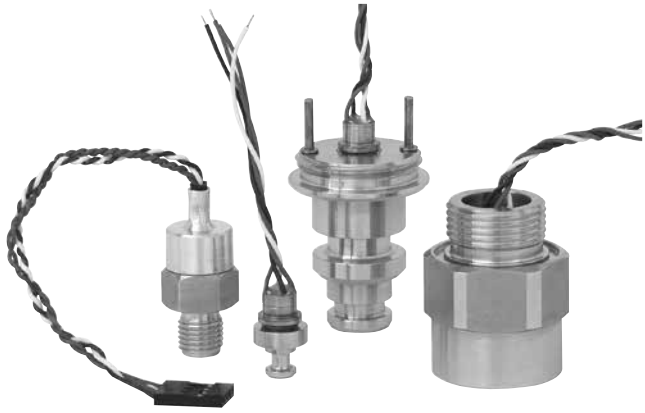
Type TTF-1 Special Purpose Thin-Film OEM-Pressure Transducer

Applications

- Applications with limited installation space
- Embedded pressure sensors
- Design-in solutions
- Hydraulic pressure monitoring

Special Features

- Thin-film technology
- Pressure ranges from 0 ... 10 bar to 0 ... 1,000 bar (150 to 15,000 PSI)
- Stainless steel wetted parts
- Media temperature range: -40 °F ... +212 °F (-40 °C ... +100 °C)
- Integrated temperature compensation



Possible versions of the TTF-1 Pressure Transducer

Description

Flexible installation
The compact size the TTF-1 pressure transducer allows it be used in applications where mounting space is very limited.

Rugged sensor element
The TTF-1 sensor is machined from a single piece of stainless steel. The thin film Wheatstone bridge is applied to the diaphragm using a physical vapor deposition process called “sputtering”. This process forms a tight molecular bond with the sensor diaphragm. This eliminates the risk of “sensor creep” that may occur over time with bonded foil strain gauge designs that use an adhesive to bond the sensor to the diaphragm.

The high grade stainless steel design of the sensor element provides a stainless steel barrier between the sensor element and the media. This completely welded, dry measuring cell does not require the use of any internal pressure transmission fluid. TTF-1 sensors constructed of Elgiloy are available for special requirements.

The sensor element is welded directly to the pressure port. This eliminates the use of soft sealing materials that may deteriorate and leak over time. It also eliminates weak points that sometimes occur when o-rings or adhesive joints seals are used.

Excellent all-around performance
The TTF-1 provides is temperature compensated from -40 °F ... +212 °F (-40 °C ... +100 °C), so that in most applications no additional temperature compensation is required.

The pressure transducer offers high overpressure safety and is resistant to pressure spikes and dynamic pressure changes. In addition the TTF-1 is an excellent sensor for applications where high accuracy, zero point stability and low temperature error are essential requirements.

Individual customer designs
Based on many years of production experience, WIKA can provide customer-specific designs for quantities above 1000 pieces.

Type A-AI-1, A-IAI-1 Attachable Indicator

Applications

- Machine tools
- Test benches
- Level measurement
- General industrial applications

Display installed on Type S-10 or S-11 transmitter

Special Features

- Display range -1999 ... 9999
- Attaches to a 4 ... 20 mA output transmitter using a DIN 43 650 L-plug
- User- adjustable on site without calibration equipment
- IP 65 Ingress protection
- Intrinsically safe explosion protection II 2G EEx ib IIC T4 (type A-IAI-1)

Description

The type A-AI-1 or A-IAI-1 attachable indicator provides an ideal solution for a local read-out with simultaneous 4-20 mA signal transmission.

The universal programmability and simple mounting allows the display to retrofit existing installed transmitters equipped with a full size DIN plug. It is loop powered so no additional power supply is required.

The scaling is adjusted by accessing three buttons under the front cover. The user is prompted through the programming steps by a logically arranged menu and prompts displayed on the LCD.

Two user-selectable filtering levels smooth the display during dynamic pressure changes and brief pressure peaks can be suppressed. All programmed parameters are stored in an EEPROM so in the event of a power failure reprogramming is unnecessary.

The IS attachable indicator type A-IAI is designed for use in potentially explosive atmospheres. This IS attachable indicator can be combined with an IS-transmitter and with an IS signal isolator or IS transmitter power supply to enable the use in Zone 1 hazardous areas.

The display is provided with an integrated, continuous self-diagnostic circuit that monitors indicator function. The integral self-diagnostic system provides error messages for sensor failure along with upper or lower deviation from the range help provide a high degree of safety.

The sturdy and compact plastic case provides IP65 ingress protection, making the display ideally suited for a great variety of industrial applications.

Specifications

Display
Type: 0.4" high LCD
Programmable display range: -1999 to +9999

Accuracy
< 0.2% of span

Programmable Range
4-20 mA can be assigned any display value within the display range. Both scaling points are individually adjustable using push buttons inside the case.

Power
Loop powered - no additional power supply required
Voltage drop: 3 VDC
Maximum current rating: 40 mA

Environmental
Operating temperature: +32 to +122°F (0 to 50°C)
Storage temperature: -22 to +176°F (-30 to +80°C)
Temperature effects: 0.1% of span per 18°F (10°C)
Humidity: <90%, non-condensing

CE Conformity
Interference emission per EN 50 081-1
Interference immunity per EN 50 082-2

Construction
Case: ABS plastic
Viewing window: polycarbonate

Dimensions (inches)
1.9 x 1.9 x 1.4 deep

Weight
Approx. 3 oz.

Programming Instructions

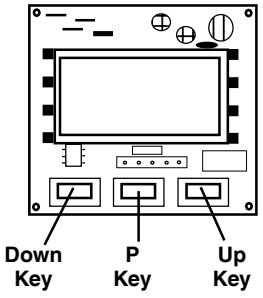
1.) Remove four cover screws and remove cover.
2.) Press the "P" Key. Display shows "dP".
3.) Press the "Up" or "Down" key to select the desired decimal place position.
4.) Press the "P" key twice. Display shows "An 4".
5.) Press the "Up" or "Down" key to set display to zero or other 4 mA display point.
6.) Press the "P" key twice. Display shows "An20".
7.) Press the "Up" or "Down" key to set the maximum range of the transmitter.
8.) Press the "P" Key twice. Display shows "LI ".
9.) Press the "Up" key to activate error code display (display shows " 1") or the down key to disable error codes (display shows "0").

Error codes: under range: Display shows "F1"
over range: Display shows "F2 "

10.) Press the "P" key. Display shows "FILt". A digital filter is available to improve the readability of the display for applications undergoing rapid pressure changes. To set the digital filtering, press the "up" or "down" key to adjust the update rate of the display:

Display	Time delay
" 0"	0.2 s
" 1"	0.5 s
" 2"	1.0 s
" 3"	1.5 s

11.) Press the "P" key to return to the display mode.



Display with cover removed

Ready-To-Ship Meters		
Type	**Part #**	**Description**
A-AI-1	7082534	Loop powered indicator for S-10, S-11 and A-10 using DIN 43 650 electrical connector (4-20 mA 2-wire only)

Type DI-15 Panel Mount Digital Indicator

Applications

- Plant construction
- Machine tools
- Onboard vehicle displays
- General industrial applications

Special Features

- Multi-function process inputs for standard signals, resistance thermometers and thermocouples
- Switching point, hysteresis and output type (NPN, PNP, Push-Pull) are all user-selectable
- EASYBUS Interface included
- High measuring rate using standard signals

Description

The compact design and multiple signal inputs make the DI15 suitable for many industrial applications.

This universal digital indicator easily adapts to specific measurement tasks and installation requirements without additional tools. Signal input selection is accomplished by using specific terminals on the back of the display and selecting the signal input type in the menu. The display can be programmed in any engineering units and the switch settings are programmable using the push buttons under the front bezel.

A user-friendly, structured menu guides the operator through all the necessary program steps by displaying text in the LED display.

Two user-programmable transistor switching outputs with independently adjustable hysteresis are standard. The digital processing ensures that the alarm set points are switched accurately. The response time can be set from 0 to 99 minutes.

An EASYBUS serial interface for measuring data transfer is a standard feature of the DI-15.

Stainless steel retaining clips are provided for easy installation in panels up to 0.39” (10 mm) thick. The compact design is suitable for installations in locations with limited mounting space such as vehicle dashboards.

Specifications Type DI-15

Display		
- Design	7-segment-LED, 4-digit, red	
- Height of digits	0.39" (10 mm)	
- Indication range	-1999 ... 9999	
Input		
- Number and type	1 multi-function input for resistance thermometers, thermocouples and standard signals	
- Input configuration	Selectable via terminal connections and menu-driven programming	
- Resistance thermometers	Pt100 3-wire, Pt1000 2-wire	max. admissible resistance per wire: 20 Ω
- Thermocouples	Type K, S, N, J, T	
- Voltage signals	0 ... 50 mV, 0 ... 1 V, 0 ... 2 V	input resistance ≥ 10 kΩ
	0 ... 10 V	input resistance ≥ 300 kΩ
- Current signals	0 ... 20 mA, 4 ... 20 mA	input resistance ~125 Ω
- Measuring rate	Approx. 4/s with temperature sensors, approx. 100/s using standard signals	
Outputs	2 switch outputs, not galvanically isolated	
- Type of output	Adjustable:	
	Low-Side (NPN, "GND-switching")	
	High-Side (PNP, "+Uv-switching")	
	Push-Pull (change-over between GND and power supply +Uv)	
- Connection data	Low-Side: 28 V, 1 A	
	High-Side: Uv, 200 mA	
- Output functions	2-step, 3-step, 2-step with alarm, common or separated Min-/Max-alarm	
- Switching points	Freely selectable	
Operation	Via 3 keys (accessible after removing the bezel) or by interface	
Interface	EASYBUS, galvanically isolated	
Power supply	DC 9 ... 28 V	
Current consumption	Max. 30 mA (without switch output and interface)	
Electrical connection	Removable screw terminals	
	2-pin for interface, 9 pin for all remaining connections	
	Wire cross section from 0.14 mm² to 1.5 mm²	
Ambient conditions		
- Ambient temperature	-4 °F ... +122 °F / -20 °C ... +50 °C	
- Storage temperature	-22 °F ... +158 °F / -30 °C ... +70 °C	
- Humidity	0 ... 80 % relative humidity (non-condensing)	
Case		
- Material	Fiberglass reinforced Noryl, polycarbonate window	
- Ingress protection	Front: IP 54; IP 65 with use of the provided O-ring seals	
- Dimensions	1.89" x .95" x 2.56" (48 mm x 24 mm x 65 mm)	
- Panel cutout	1.77" x .85" (45 mm x 21.7 mm)	
- Mass	Approx. 50 g	
- Mounting	Stainless steel spring clip for a wall thickness from .039" to .39" (1 to 10 mm)	

Input signal	Measuring span		Measuring error in [%] of the span
Current signals			
0 ... 20 mA	-1999 ... 9999 [1]		± 0.2 % ± 1 digit
4 ... 20 mA	-1999 ... 9999 [1]		± 0.2 % ± 1 digit
Voltage signals			
0 ... 50 mV	-1999 ... 9999 [1]		± 0.3 % ± 1 digit
0 ... 1 V	-1999 ... 9999 [1]		± 0.2 % ± 1 digit
0 ... 2 V	-1999 ... 9999 [1]		± 0.2 % ± 1 digit
0 ... 10 V	-1999 ... 9999 [1]		± 0.2 % ± 1 digit
Thermocouples			
Type K, NiCr-Ni	-454 ... +2562 °F	-270 ... +1406 °C	± 0.3 % ± 1 digit
Type J, Fe-CuNi	-274 ... +1742 °F	-170 ... +950 °C	± 0.3 % ± 1 digit
Type S, Pt10Rh-Pt	-58 ... +3182 °F	-50 ... +1750 °C	± 0.5 % ± 1 digit
Type T, Cu-CuNi	-454 ... +752 °F	-270 ... +400 °C	± 0.3 % ± 1 digit
Type N, NiCrSi-NiSi	-454 ... +2372 °F	-270 ... +1300 °C	± 0.3 % ± 1 digit
Resistance thermometers			
Pt100 (3-wire)	-58 ... +392 °F	-50.0 ... +200 °C	± 0.5 % ± 1 digit
	-328 ... +1562 °F	-200 ... +850 °C	± 0.5 % ± 1 digit
Pt1000 (2-wire)	-328 ... +1562 °F	-200 ... +850 °C	± 0.5 % ± 1 digit

1) Decimal point adjustable

Terminal configuration

Terminal	Housing inscription	Meaning
1	Output 1	Switching output 1
2	Output 2	Switching output 2
3	GND	Switching output GND
4	Supply +Uv	Supply voltage +Uv
5	GND, Supply -Uv	Supply voltage GND
6	10 V	Input: 0 ... 10 V
7	GND Pt100(0)	Input: GND, Pt100 (B), Pt1000
8	mV, TC, Pt100	Input: 0 ... 50 mV, thermocouple (+), Pt100 (A)
9	1 V, mA, Freq., Pt100(0)	Input: 0 ... 1 V, 0 ... 2 V, 0(4) ... 20 mA, frequency, Pt100 (B), Pt1000
10	EASYBUS	EASYBUS interface
11	EASYBUS	EASYBUS interface

Note: The terminals 3, 5 and 7 are internally connected.

Ready-To-Ship Meters

Type	Part #	Description	
DI-15	7464880	Digital indicator with 2 solid state relays for panel mounting, accepts 4-20mA, 0-20mA, 01V, 0-10V, Pt1000 signal inputs.	

Type S-10-3A Sanitary Pressure Transmitter

Applications

- Food and beverage
- Pharmaceutical
- Cosmetic

Special Features

- Compliant with 3A
- Available with 3/4", 1.5" or 2.0" Tri-Clamp® connections
- 4-20 mA 2-wire output signal, others available
- Available with an integral cooling extension for high temperature applications
- Stainless steel case and wetted components

S-10-3A

S-10-3A.C

≥1½" Tri-Clamp® process connection

Description

WIKA S-10-3A pressure transmitters are in compliance with 3A 3rd party sanitary criteria for pressure and level measurement in the food, pharmaceutical, cosmetic and beverage industries. They feature 0.5% accuracy, 0.25 % B.F.S.L, rugged stainless steel construction, and a wide operating temperature range.

The 316L SS flush diaphragm minimizes product buildup. The all welded diaphragm seal system includes FDA and USP approved system fill fluid and is designed for "clean in place" (CIP) and "sterilize in place" (SIP) maintenance procedures. The transmitters are available with industry standard 3/4", 1.5" or 2.0" Tri-Clamp® connections. The S-10-3A.C is designed for use with media temperatures up to 350°F (177°C).

Each transmitter undergoes extensive quality control testing and calibration. The printed circuit boards use state-of-the-art surface mount technology and are potted in silicone gel for protection against mechanical shock, vibration and moisture. Each transmitter is manufactured to assure accuracy and long term stability when exposed to severe ambient temperature variations.

Type SA-11 Sanitary Pressure Transmitter

Special features

- Compliant with 3A sanitary criteria
- 1.5" and 2" Tri-Clamp® connections
- Pressure ranges include vacuum, compound and gauge ranges as low as 100 inches water column
- 4-20 mA 2-wire output signal, others available
- Designed for media temperature up to 150°C (300°F)
- Wetted surface finish R_a < 16µ inch

Type S

Type SA-11 with optional IP 68 cable

Description

WIKA SA-11 pressure transmitters meet 3A and EHEDG sanitary criteria for pressure and level measurement in the food, pharmaceutical, cosmetic and beverage industries. They feature 0.25% accuracy, rugged 316L SS wetted construction and a wide operating temperature range.

The SA-11 features an integral cooling extension between the Tri-Clamp® connection and transmitter body. This design increases the maximum permissible media temperature to 150°C (300°F).

The 316L SS flush diaphragm ensures a crevice free seal between the process connection and the pressure measuring diaphragm. The permanently sealed sensing system includes food grade (FDA approved) liquid fill and is designed for "clean in place" (CIP) and "sterilize in place" (SIP) maintenance procedures. The transmitters are available with industry standard 1.5" or 2" Tri-Clamp® connections. They can be ordered with an optional NEMA 6P (IP 68) cable assembly for additional protection in wash down areas.

Tri-Clamp® is a registered trademark of Tri-Clover Inc.

Type F-20-3A Sanitary Pressure Transmitter NEMA 4X with Integral Junction Box

Applications

- Food and beverage industry
- Pharmaceutical industry
- Biotechnology industry
- Cosmetic industry

Special Features

- Meets “3A” criteria
- Available with 3/4”, 1.5” and 2.0” Tri-Clamp® process connection
- Stainless steel transmitter housing
- 316LSS electropolished wetted surfaces, Ra<20 µ inch
- FDA approved system fill fluid
- Standard pressure ranges from 15psi up to 1,500psi (vacuum and compound ranges available)
- 4-20mA or voltage output signals are available

F-20-3A shown with 3/4” Tri-Clamp® process connection

F-20-3A shown with 1.5” Tri-Clamp® process connection

Description

Compact design

WIKA F-20-3A pressure transmitters are in compliance with “3A” third party criteria for pressure and level measurement in all sanitary applications. The process wetted surfaces of 316L SS are electropolished to reduce cleaning time. This transmitter features 0.25% output linearity (BFSL) over a wide operating temperature range.

The transmitters are available with industry standard 3/4”, 1.5” and 2.0” Tri-Clamp® process connections. Mineral oil (KN92) is the standard system fill fluid behind the process connection diaphragm (glycerine for positive pressure 3/4” Tri-Clamp®) both approved by FDA. The transmitter assembly is designed for “Clean in Place” (CIP) and “Steam in Place” (SIP) maintenance procedures.

The all stainless steel case meets NEMA 4X / IP 67 requirements for wash down and corrosion resistance and ingress protection is available up to IP 68 per IEC 60 529. The smooth exterior surface finish makes it ideal for the sanitary industry to ensure cleanliness. The all-welded design eliminates all threaded connections (excluding transmitter cover) where contaminants may collect.

Easily accessible electrical connection

The sophisticated design of this transmitter provides for fast and easy installation. The junction box cover unscrews for access to the internal spring clip terminal block.

Additional features

Transmitters with the 4-20mA output signal includes an internal test circuit connection that permits the transmitter to be tested without disconnecting the primary 4-20mA circuit. Removal of transmitter cover allows easy access to zero and span adjustment potentiometers. The standard conduit connection is 1/2”npt-female with the option of a NEMA 6P (IP 68) cable gland.

Documentation

Material identification engraved in seal body. Material conformance documents and Calibration Conformance Report supplied with each assembly (not a direct substitute for 3.1b material traceability certificate or NIST calibration certificate).

Optional features

Process connections of 2.5”, 3.0” and 4.0” Tri-Clamp® along with other industry specific types and sizes. Pressure ranges below 15 psi are available with the larger process connection sizes. For highly corrosive applications, process wetted materials other than 316L SS are available. Additional FDA approved system fill fluids are available; NEOBEE®-M20 (KN59), glycerine (KN7) and food grade silicone (KN34). Optional certifications are available; NIST calibration, 3.1b material traceability to EN 10 204 and electropolish with nominal surface finish.

Specifications

Materials		
■ Wetted parts		316L SS, electropolished
■ Case		Stainless steel
Internal transmission fluid		Mineral Oil, KN92 (Glycerine for 3/4" Tri-Clamp® and positive pressure) {Listed by FDA for food applications}
Process connection size & suitable pressure span		3/4" Tri-Clamp® - 60 psi minimum 1.5" & 2.0" Tri-Clamp® - 15 psi 2.5" and larger Tri-Clamp® - Consult factory
Power supply U_B +	VDC	10 < 40+≤ 30 (11 ... 30 with signal output 4 ... 20 mA, 14 ... 30 with signal output 0 ... 10 V)
Signal output and maximum load R_A		4 ... 20 mA, 2-wire R_A (U_B -10 V) / 0,02 A with R_A in Ohm and UB in Volt 0 ... 20 mA, 3-wire R_A (U_B - 3 V) / 0,02 A with R_A in Ohm and UB in Volt {0 ... 5 V, 3-wire} R_A > 5 kOhm, {0 ... 10 V, 3-wire} R_A >10 kOhm
Test circuit signal / max. load R_A		Only for instruments with 4 ... 20 mA signal output. R_A < 15 Ohm
Adjustability zero/span	% of span	± 5 using potentiometers inside the instrument
Response time (10 ... 90 %)	ms	< 1 (base transmitter)
Isolation voltage	VDC	500

Accuracy [1]		1.5" Tri-Clamp®		3/4" Tri-Clamp®	
	% of span	≤0.25	(BFSL)	≤0.5	(BFSL)
	% of span	≤0.5	(limit point calibration)	≤1.0	(limit point calibration)

[1] Including linearity, hysteresis and repeatability. Limit point calibration performed in vertical mounting position with pressure connection facing down.

Non-repeatability	% of span	0.1%	
1-year stability	% of span	0.2 (at reference conditions)	
Permissible temperatures		3/4" Tri-Clamp®	≥1.5" Tri-Clamp®
■ Medium		+32ºF (0ºC) to +250ºF (+121ºC)	-4ºF (-20ºC) to +300ºF (+149ºC)
■ Ambient		+32ºF (0ºC) to +140ºF (+60ºC)	-4ºF (-20ºC) to +140ºF (+60ºC)
■ Storage		-40ºF (-40ºC) to +212ºF (100ºC)	-40ºF (-40ºC) to +212ºF (100ºC)

Temperature coefficients (cumulative values, reference temperature +70ºF)		3/4" Tri-Clamp®	≥1.5" Tri-Clamp®
Transmitter output	% of span	≤ 0.2 / 10ºC	≤0.2 / 10ºC
■ Stability, 1 Year			
■ Ambient effects	psi / 10º C	0.6	0.03
■ Medium effects	psi / 10º C	0.3	0.02
CE- conformity		89/336/EWG interference emission and immunity see EN 61 326 interference emission limit class A and B 97/23/EG Pressure equipment directive (Module H)	

Shock resistance	g	600 according to IEC 60068-2-27	(mechanical shock)
Vibration resistance	g	10 according to IEC 60068-2-6	(vibration under resonance)
Wiring protection		Protected against reverse polarity, overvoltage and short circuiting	
Electrical connection		Internal spring clip terminals; wire cross section 2.5 mm² max, internal ground Terminal for brass nickel-plated or {stainless steel} threaded connection {additional external ground terminal for stainless steel threaded conduit connection}	
Weight	lb.	Approx. 1.3	

{ } Items in curved brackets are optional extras at additional cost.

Notes:
(1) Not available with ¾" Tri-Clamp® process connection
(2) Consult WIKA for suitable process connection size
(3) Not recommended for vacuum or compound pressure ranges
(4) Standard offering for ¾" Tri-Clamp® with positive pressure ranges

NOTES:

Penoresan.com

With almost 70 years of experience, WIKA Instrument, LP is the leading global manufacturer of pressure and temperature measurement instrumentation, producing more than 43 million pressure gauges, diaphragm seals, pressure transmitters, thermometers and other instruments annually. WIKA's extensive product line, including mechanical and electronic instruments, provides measurement solutions for any application in a large variety of industries. A global leader in lean manufacturing and instrumentation experience, WIKA also offers a broad selection of stock and custom instrumentation as well as dedicated services to provide customers with the right solutions, at the right time, wherever they need us.

Explosion-proof Pressure Transmitter

E-11

General Purpose Pressure Transmitter

S-10

WIKA provides distinctive service and support to our channel partners and customers:

- Award winning U.S.-based manufacturing, sales and ordering customer service and technical support
- Certified technical specialists who conduct Best Practice Instrument Reviews with performance improvement reports
- An in-house engineering team for product customization and innovation
- Proven capabilities to connect with customer business processes for ordering and inventory management
- Web-based customer service features, including RFQs, literature request and competitor product cross reference
